Summary of spaying and neutering guidelines based on findings regarding joint disorders and cancers. *Australian Shepherd and Pug female dogs had no statistically significantly elevated joint disorders or cancers with early neutering. Nonetheless, they are examples of breeds with more joint disorders and/or cancer cases among the early neutered animals, and these may have become significant in a larger dataset (12). **This recommendation for Doberman Pinscher and Shetland Sheepdog females is based on their elevated risks of U/L, not joint disorders or cancers (12).
