Architecture Must Burn A Manifesto For An Architecture Beyond Building:

Architecture Must Burn Aaron Betsky, Erik Adigard, 2000 This work presents a combative fusion of ideas and graphic design mixing contemporary theories on spatiality technology literature and art It contains 28 discussions revolving around the notion that architecture is an example of technology acting as a form of poetry *Architecture and Fire* Stamatis Zografos, 2019-06-12 *Architecture and Fire* develops a conceptual reassessment of architectural conservation through the study of the intimate relationship between architecture and fire Stamatis Zografos expands on the general agreement among many theorists that the primitive hut was erected around fire locating fire as the first memory of architecture at the very beginning of architectural evolution Following the introduction Zografos analyses the archive and the renewed interest in the study of archives through the psychoanalysis of Jacques Derrida He moves on to explore the ambivalent nature of fire employing the conflicting philosophies of Gaston Bachelard and Henri Bergson to do so before discussing architectural conservation and the relationship between listed buildings the function of archives and the preservation of memories from the past The following chapter investigates how architecture evolves by absorbing and accommodating fire while the penultimate chapter examines the critical moment of architectural evolution the destruction of buildings by fire with a focus on the tragic disaster at London's Grenfell Tower in 2017 Zografos concludes with thoughts on Freud's drive theory He argues the practice of architectural conservation is an expression of the life drive and a simultaneous repression of the death drive which suggests controlled destruction should be an integral part of the conservation agenda *Architecture and Fire* is founded in new interdisciplinary research navigating across the boundaries of architecture conservation archival theory classical mythology evolutionary theory thermodynamics philosophy and psychoanalysis It will be of interest to readers working in and around these disciplines *Sayable Space. Narrative Practices in Architecture* Giovanni Corbellini, 2021-11-18 When a work reaches its maximum intensity wrote Le Corbusier a phenomenon of ineffable space occurs The ultimate quality of architecture would reside therefore in the resistance to its description However to tell us this and much more the Swiss master has published more than seventy books and his so compelling formula in supporting the ineffable also shows how words are able to grasp it This brief essay investigates the multiple intersections between discourse and design the way buildings try to talk with their own specific means how architects are trying to remain relevant without building the paradoxes of architecture description after its completion the modes of communication during the project processes the capacity of narrative to act before the project operations start and infiltrate the collective perception making possible innovative approaches *Executive Design of the Façade Systems* Ingrid Paoletti, Massimiliano Nastri, 2023-09-25 The book examines the typological and technological constitution of the principal advanced façade systems in the contemporary design and experimental scenario proposing itself as a knowledge and operational tool currently lacking in the technical literature of the sector at an international level It considers the field of advanced façade systems in a scientific way

constituting a support for the study and the executive design The book investigates in detail in an analytical form the constitution of the components on a typological and geometrical functional and constructive level on the basis of the documents and knowledges acquired from the essential contemporary production and construction references At the same time the book is configured in a handbook form as a reference for understanding and application with respect to traditional and complex fa ade systems For each main type of fa ade the book provides explanations and scientific information for investigating and designing the advanced fa ades according to the characteristics of the mullions and transoms fa ade system stick system of the structural sealant glazing fa ade system of the unit fa ade system of the suspended fa ade system and of the double skin fa ade system

Understanding Cities Alexander R. Cuthbert, 2011 *Understanding Cities* is richly textured complex and challenging It creates the vital link between urban design theory and praxis and opens the required methodological gateway to a new and unified field of urban design Using spatial political economy as his most important reference point Alexander Cuthbert both interrogates and challenges mainstream urban design and provides an alternative and viable comprehensive framework for a new synthesis He rejects the idea of yet another theory in urban design and chooses instead to construct the necessary intellectual and conceptual scaffolding for what he terms The New Urban Design Building both on Michel de Certeau s concept of heterology thinking about thinking and on the framework of his previous books *Designing Cities* and *The Form of Cities* Cuthbert uses his prior adopted framework history philosophy politics culture gender environment aesthetics typologies and pragmatics to create three integrated texts Overall the trilogy allows a new field of urban design to emerge Pre existing and new knowledge are integrated across all three volumes of which *Understanding Cities* is the culminating text

No More Rules Rick Poyner, 2003 With the international take up of new technology in the 1990s designers and typographers reassessed their roles and jettisoned existing rules in an explosion of creativity in graphic design This book tells that story in detail defining and illustrating key developments and themes from 1980 2000

The Contradictions of Urban Art Ewa Rewers, 2013 This book examines the dynamics of artistic creativity that transgresses the boundaries of public art and it looks into the inventions expressed by the practical activities and academic research focused on contemporary urban spaces *The Contradictions of Urban Art* demonstrates how the multilingualism of art and science raises the temperature of discussions concerning the city It advises that what we call city art should include outdoor events prose and poetry
