sound **The Rise of Awards in Architecture** Jean-Pierre Chupin, Carmela Cucuzzella, Georges Adamczyk, 2022-09-06 This book is the first scientific study to focus on awards in architecture and the built environment investigating their exponential growth since the 1980s The celebration of excellence in architecture and related fields remains a phenomenon on which there is strangely little scientific scrutiny What is to be understood from the plethora of award winning projects award winning buildings and awarded professional practices in the built environment year after year Glossy images partake in an intense ballet at every local regional national or international award ceremony and they are meant to embody proofs of architectural excellence However it is necessary to take a critical distance to question what awards are meant to embody symbolize and perhaps measure Each of the 10 chapters in this volume is centered on one question related to themes as varied as the comparison of Pritzker and Nobel Prizes the Prix de Rome the redefinition of quality through awards green awards and sustainability the multiplication of sustainable awards heritage awards architecture book awards the awarding of school architecture awards as mediations and awards as pedagogical devices Many fields once consolidated have featured a sharp increase in related prizes The original data compiled and summarized in 4 appendices cover more than 150 award granting organizations in some 30 countries Our inventory includes upwards of 24 000 prizes awarded at more than 3 100 events the earliest of which is the first instance of Western architecture's seminal Grand Prix de Rome in France in 1720 A history of contemporary architecture is thus written through press releases that praise the merits of the heroes as much as their works and achievements And while awards can be vehicles that propel architecture forward they can also be Trojan horses in an era that is constantly on the lookout for event driven products small and big news and brand imaging **The Architecture of Kris Yao/Artech** Kris Yao, The Images Publishing Group, 2011 Kris Yao is one of Taiwan's best known architects Recognised for his distinctive creative flair he has produced many award winning architectural designs and has received both local and international acclaim The sense of energy and innovation he has brought to Architecture, 1919

Constructing a Place of Critical Architecture in China Guanghui Ding, 2016-03-09 For the past 30 years The Chinese journal Time Architecture Shidai Jianzhu has focused on publishing innovative and exploratory work by emerging architects based in private design firms who were committed to new material theoretical and pedagogical practices In doing so this book argues that the journal has engaged in the presentation and production of a particular form of critical architecture described as an intermediate criticality as a response to the particular constraints of the Chinese cultural and political context The journal's publications displayed a dual critique a resistant attitude to the dominant modes of commercial building practice characterised by rapid and large scale urban expansion and an alternative publishing practice focusing on emerging independent architectural practitioners through the active integration of theoretical debates architectural projects and criticisms This dual critique is illustrated through a careful review and analysis of the history and programme of the journal By showing how the work of emerging architects including Yung Ho Chang Wang Shu Liu Jiakun and Urbanus are situated

within the context of the journal's special thematic editions on experimental architecture exhibition group design new urban space and professional system the book assesses the contribution the journal has made to the emergence of a critical architecture in China in the context of how it was articulated debated presented and perhaps even produced within the pages of the publication itself The protagonists of critical architecture have endeavoured to construct an alternative mode of form and space with strong aesthetic and socio-political implications to the predominant production of architecture under the current Chinese socialist market economy To rebel against certain forms of domination and suppression by capital and power is by no means to completely reject them rather it is to use those
