Slethaug, 2014-06-19 Traditional critics of film adaptation generally assumed a that the written text is better than the film adaptation because the plot is more intricate and the language richer when pictorial images do not intrude b that films are better when particularly faithful to the original c that authors do not make good script writers and should not sully their imagination by writing film scripts d and often that American films lack the complexity of authored texts because they are sourced out of Hollywood The faithfulness view has by and large disappeared and intertextuality is now a generally received notion but the field still lacks studies with a postmodern methodology and lens Exploring Hollywood feature films as well as small studio productions *Adaptation Theory and Criticism* explores the intertextuality of a dozen films through a series of case studies introduced through discussions of postmodern methodology and practice Providing the reader with informative background on theories of film adaptation as well as carefully articulated postmodern methodology and issues Gordon Slethaug includes several case studies of major Hollywood productions and small studio films some of which have

been discussed before *Age of Innocence* *Gangs of New York* and *Do the Right Thing* and some that have received lesser consideration *Six Degrees of Separation* *Smoke Signals* *Broken Flowers* and various *Snow White* narratives including *Enchanted* *Mirror Mirror* and *Snow White and the Huntsman* Useful for both film and literary studies students *Adaptation Theory and Criticism* cogently combines the existing scholarship and uses previous theories to engage readers to think about the current state of American literature and film

Theorizing Adaptation Kamilla Elliott, 2020 From film and television theory to intertextuality poststructuralism to queer theory postcolonialism to meme theory a host of contemporary theories in the humanities have engaged with adaptation studies Yet theorizing adaptation has been deemed problematic in the humanities theoretical and disciplinary wars been

charged with political incorrectness by both conservative and radical scholars and declared outdated and painfully behind the times compared to other disciplines And even separate from these problems of theorization is adaptation s subject matter with many film adaptations of literature widely and simply declared bad In this thorough and groundbreaking study author Kamilla Elliott works to detail and redress the problem of theorizing adaptation She offers the first cross disciplinary history of theorizing adaptation in the humanities extending back in time to the sixteenth century revealing that before the late eighteenth century adaptation was valued and even celebrated for its contributions to cultural progress before its eventual and ongoing marginalization Elliott also presents a discussion of humanities theorization as a process arguing the need to rethink how theorization functions within humanities disciplines and configure a new relationship between theorization and adaptation and then examines how rhetoric may work to repair this difficult relationship Ultimately Theorizing Adaptation seeks to find shared ground upon which adaptation scholars can dialogue and debate productively across disciplinary cultural and theoretical borders without requiring theoretical assent or uniformity
