

Problem 4.23

$$3 - 5 - (-8) + 6 - 20$$

We will work left to right and perform only one operation at a time.

<u>$3 - 5$</u> $- (-8) + 6 - 20$	We start with the first computation on the left. While you may not explicitly write this, recall that $3 - 5 = 3 + (-5)$
$-2 - (-8) + 6 - 20$	We replace the underlined part with the result of the computation, and carefully bring everything else down.
<u>$-2 - (-8)$</u> $+ 6 - 20$	In this case, you would be well advised to make the substitution of subtraction for addition, before performing any computations.
<u>$-2 + (+8)$</u> $+ 6 - 20$	We did not perform any calculations, but we rewrote the expression to make it easier to complete the problem correctly.
$6 + 6 - 20$	We performed the calculation and brought everything else down.
<u>$6 + 6$</u> $- 20$	We now work left to right and perform the next operation.
$12 - 20$	We replace the underlined part with the result of the computation, and carefully bring everything else down.
<u>$12 - 20$</u>	There is only one computation left. Again, you may not explicitly write this, but recall that $12 - 20 = 12 + (-20)$
-8	This is the answer.

■

/ **Problem 4.24**

$$6 + (-5) - 2$$

/ **Problem 4.25**

$$-16 + 13 - (-3)$$

Challenging Problems in Algebra Alfred S. Posamentier, Charles T. Salkind, 2012-05-04 Over 300 unusual problems ranging from easy to difficult involving equations and inequalities Diophantine equations number theory quadratic equations logarithms more Detailed solutions as well as brief answers for all problems are provided Teaching Early Algebra through Example-Based Problem Solving Meixia Ding, 2021-04-07 Drawing on rich classroom observations of educators teaching in China and the U S this book details an innovative and effective approach to teaching algebra at the elementary level namely teaching through example based problem solving TEPS Recognizing young children s particular cognitive and developmental capabilities this book powerfully argues for the importance of infusing algebraic thinking into early grade mathematics teaching and illustrates how this has been achieved by teachers in U S and Chinese contexts Documenting best practice and students responses to example based instruction the text demonstrates that this TEPS approach which involves the use of worked examples representations and deep questions helps students learn and master fundamental mathematical ideas making it highly effective in developing algebraic readiness and mathematical understanding This text will benefit post graduate students researchers and academics in the fields of mathematics STEM and elementary education as well as algebra research more broadly Those interested in teacher education classroom practice and developmental and cognitive psychology will also find this volume of interest **Guided Problem Solving Workbook, Succeed with Word Problems!-**

Schliemann, David W. Carraher, Bárbara M. Brizuela, 2006-08-29 Bringing Out the Algebraic Character of Arithmetic contributes to a growing body of research relevant to efforts to make algebra an integral part of early mathematics instruction an area of studies that has come to be known as Early Algebra It provides both a rationale for promoting algebraic reasoning in the elementary school curriculum and empirical data to support it The authors regard Early Algebra not as accelerated instruction but as an approach to existing topics in the early mathematics curriculum that highlights their algebraic character Each chapter shows young learners engaged in mathematics tasks where there has been a shift away from computations on specific amounts toward thinking about relations and functional dependencies The authors show how young learners attempt to work with mathematical generalizations before they have learned formal algebraic notation The book suitable as a text in undergraduate or graduate mathematics education courses includes downloadable resources with additional text and video footage on how students reason about addition and subtraction as functions on how students understand multiplication when it is presented as a function and on how children use notations in algebraic problems involving fractions These three videopapers written text with embedded video footage present relevant discussions that help identify students mathematical reasoning The printed text in the book includes transcriptions of the video episodes in the CD ROM Bringing Out the Algebraic Character of Arithmetic is aimed at researchers practitioners curriculum developers policy makers and graduate students across the mathematics education community who wish to understand how young learners deal with algebra before they have learned about algebraic notation Bold Ventures Raizen, 2012-12-06 This book presents comprehensive results from case studies of three innovations in mathematics education that have much to offer toward understanding current

reforms in this field Each chapter tells the story of a case in rich detail with extensive documentation and in the voices of many of the participants the innovators the teachers the students Similarly Volume 2 of Bold Ventures presents the results from case studies of five innovations in science education Volume 1 provides a cross case analysis of all eight innovations Many U S readers certainly will be very familiar with the name of at least one if not all of the mathematics innovations discussed in this volume for example the NCTM Standards and probably with their general substance Much of the education community's familiarity with these arises from the projects own dissemination efforts The research reported in this volume however is one of the few detailed studies of these innovations undertaken by researchers outside the projects themselves

Intelligent Tutoring Systems Barry P. Goettl, Henry M. Halff, Carol L. Redfield, Valerie J. Shute, 2003-06-29 The first International Conference on Intelligent Tutoring Systems ITS was held ten years ago in Montreal ITS 88 It was so well received by the international community that the organizers decided to do it again in Montreal four years later in 1992 and then again in 1996 ITS 98 differs from the previous ones in that this is the first time the conference has been held outside of Montreal and it's only been two years not four since the last one One interesting aspect of the ITS conferences is that they are not explicitly bound to some organization e g IEEE or AACE Rather the founder of these conferences Claude Frasson started them as a means to congregate researchers actively involved in the ITS field and provide a forum for presentation and debate of the most currently challenging issues Thus the unifying theme is science This year's hot topics differ from those in the earlier ITS conferences as they reflect ever changing trends in ITS research A few of the issues being examined at ITS 98 include Web based tutoring systems deploying ITS in the real world tutoring and authoring tools architectures and knowledge structure and representation
