Algebra Golf Course Project:

Challenging Units for Gifted Learners Kenneth J. Smith, Susan Stonequist, 2021-09-03 Gifted students have the potential to learn material earlier and faster to handle more complexity and abstraction and to solve complex problems better. This potential however needs stimulating experiences from home and school or it will not unfold. These books are designed to help teachers provide the stimulating curricula that will nurture this potential in school. The units presented in this series are based on research into how these students actually think differently from their peers and how they use their learning styles and potential not merely to develop intellectual expertise but to move beyond expertise to the production of new ideas. The Math book includes units that ask students to develop a financial portfolio that includes high and low risk stocks, options and margins, AAA and junk bonds, mutual funds and money markets, use math, science, engineering, technology and art to design and build a miniature golf course, develop games based on probability and run a real life small business. Grades 6-8

The Algebra of Wealth Scott Galloway, 2024-04-23 AN INSTANT 1 NEW YORK TIMES BESTSELLER A must have guide to optimizing your life for wealth and success from bestselling author NYU professor and cohost of the Pivot podcast. Scott Galloway: Today's workers have more opportunities and mobility than any generation before. They also face unprecedented challenges including inflation, labor and housing shortages and climate volatility. Even the notion of retirement is undergoing a profound rethink as our lifespans extend and our relationship with work evolves. In this environment, the tried and true financial advice our parents followed is no longer enough. It's time for a new playbook. In *The Algebra of Wealth*, Scott Galloway lays bare the rules of financial success in today's economy. In his characteristic unvarnished, no BS style, he explains what you need to know in order to better your chances for economic security, no matter what. You'll learn: How to find and follow your talent, not your passion, when making career decisions. How to ride and optimize big economic waves. Hard truth: market dynamics always trump individual achievement. What small steps you can take that pay big returns later, including diversification and tax planning. How stoicism can help you minimize spending and develop better financial habits. Brimming with wise, game-changing advice from one of the world's most popular business school professors, *The Algebra of Wealth* offers a powerful framework for making the most of what opportunities come your way.

Research in Education, 1969-05
Resources in Education, 1992 *Exemplary Programs in Introductory College Mathematics* Susan S. Lenker, 1998 This handbook contains a collection of the winning entries in the first INPUT Competition, part of the INPUT Innovative Programs Using Technology Project. The INPUT Project was designed to improve instruction by recognizing and rewarding college instructors who rethought the mathematical content of their introductory mathematics courses with innovative uses of technology. The targeted introductory mathematics courses were developmental mathematics, precalculus, business mathematics and introductory statistics.
