A Study of Interpersonal Relations Patrick Mullahy, 1949 **Conflict, Power, and Games** James T. Tedeschi, 2017-07-12 The technological revolution in the social sciences made available a set of research tools and data manipulation techniques that permit the study of complex social processes previously inaccessible or not amenable to our observational powers One important set of tools took the generic title experimental games which were characterized by the interactive protagonists pursuit of relatively well defined goals whose achievement is dependent on the behavior of others James T Tedeschi Barry R Schlenker and Thomas V Bonoma in this work explicate these highly structured interactions The grand strategy of scientific inquiry is the development of explanatory systems for natural phenomena The empirical tactics devised to manipulate control observe and measure events or processes of interest often require as much ingenuity and imagination as theory development itself Generally the situation is so structured that certain rules govern participant behavior Within these constraints the social psychological processes of conflict influence power bargaining and coalition formation can be studied Concerned with the more formal and technical aspects of games the authors explain how they are used for purposes of developing and testing scientific theory The emphasis throughout is on the development and empirical evaluation of a scientific theory of social influence and power in situations where the interests of the interacting parties are in conflict Experimental games have provided many of the concepts and the preponderance of evidence that have helped to unravel many of the complexities of social behavior In *Conflict Power and Games* the authors build a bridge between technical and non technical approaches in order to shed greater light on interpersonal relations [A study of interpersonal relations](#) Patrick Mullahy, 1949 *A Study of Interpersonal Relations* Patrick Mullahy , 1949 **Why Can't We All Just Get Along** William N.
