QUESTIONS

1. a. Common asset accounts: cash, accounts receivable, notes receivable, prepaid expenses (rent, insurance, etc.), office supplies, store supplies, equipment, building, and land.

An account payable is usually short-term.
3. There are several steps in processing transactions: (1) identify and analyze the transaction or event, including the source document(s), (2) apply double-entry accounting, (3) record the transaction or event in a journal, and (4) post the journal entry to the ledger. 7. Expense accounts have debit balances because they are decreases to equity (and equity has a credit balance).
8. The recordkeeper prepares a trial balance to summarize the contents of the ledger and to verify the equality of total debits and total credits. The trial balance also serves as a helpful internal document for preparing financial statements and other reports.
9. The error should be corrected with a separate (subsequent) correcting entry. The entry's explanation should describe why the correction is necessary.
