

ASSETS

Assets are resources owned by a business that have economic value. They are the result of investments made by the business or its owners. Assets are recorded on the balance sheet and are classified into current assets and non-current assets.

- **Non-current Assets:** These are assets that are not expected to be converted into cash or sold within the next 12 months. Examples include property, plant, and equipment, and intangible assets like patents and trademarks.

Assets are measured in terms of their fair value, which is the price that would be received from the sale of an asset in an orderly transaction between market participants at the measurement date.

LIABILITIES
