Fundamentals of Fibre Reinforced Composite Materials A.R. Bunsell,J Renard,2005-06-15 Fiber reinforced composite materials encompass a wide range of material classes from reinforced glasses plastics and rubbers through to more recently developed metals and ceramics Fundamentals of Fibre Reinforced Composite Materials is a comprehensive and authoritative book that introduces the topic with a brief history of composite development a review of composite applications the types of fibre used and their respective individual properties An entire chapter considers organic matrices and their behavior reviewing all of the most commonly encountered polymer matrix systems Composite manufacturing techniques are then discussed including those methods employed in the production of advanced metal and ceramic matrix composites The remaining chapters are devoted primarily to theoretical treatments of composite behavior with emphasis on the understanding of damage mechanisms such as cracking delamination and fibre breakage Where a mathematical approach is required an attempt is made to relate the sometimes rather abstract notions back at the structure of the material being discussed With extensive sets of sample problems accompanying each chapter Fundamentals of Fibre Reinforced Composite Materials is ideally suited to undergraduate and graduate students of materials science structural mechanical and aeronautical engineering polymer science metallurgy physics and chemistry It will also be of use as a reference to researchers working with composite materials and material scientists in general *Load Bearing Fibre Composites* Michael Piggott,2007-05-08 This is a thoroughgoing revision and expansion of the earlier book bringing it up to date with the latest research The older ideas are presented along with the new and the experimental evidence is given in outline and fully referenced Where practical illustrations are chosen from key works and the source reference is given in the subtitle as in the first edition As before this book is directed toward upper year university students and graduate students
