Stability of Structures Chai H Yoo, Sung Lee, 2011-05-12 The current trend of building more streamlined structures has

made stability analysis a subject of extreme importance It is mostly a safety issue because Stability loss could result in an unimaginable catastrophe Written by two authors with a combined 80 years of professional and academic experience the objective of *Stability of Structures Principles and Applications* is to provide engineers and architects with a firm grasp of the fundamentals and principles that are essential to performing effective stability analysis Concise and readable this guide presents stability analysis within the context of elementary nonlinear flexural analysis providing a strong foundation for incorporating theory into everyday practice The first chapter introduces the buckling of columns It begins with the linear elastic theory and proceeds to include the effects of large deformations and inelastic behavior In Chapter 2 various approximate methods are illustrated along with the fundamentals of energy methods The chapter concludes by introducing several special topics some advanced that are useful in understanding the physical resistance mechanisms and consistent and rigorous mathematical analysis Chapters 3 and 4 cover buckling of beam columns Chapter 5 presents torsion in structures in some detail which is one of the least well understood subjects in the entire spectrum of structural mechanics Strictly speaking torsion itself does not belong to a topic in structural stability but needs to be covered to some extent for a better understanding of buckling accompanied with torsional behavior Chapters 6 and 7 consider stability of framed structures in conjunction with torsional behavior of structures Chapters 8 to 10 consider buckling of plate elements cylindrical shells and general shells Although the book is primarily devoted to analysis rudimentary design aspects are discussed Balanced presentation for both theory and practice Well blended contents covering elementary to advanced topics Detailed presentation of the development
