Aspergers Children Psychodynamics Aetiology Diagnosis:

Asperger's Children Robin Holloway, 2018-05-08 The DSM 5 2013 classifies all autism related disorders including Asperger's under the heading autism spectrum disorder This book argues that this lumping together is unhelpful for clinicians Instead finer diagnostic distinctions are helpful to clinicians who treat children with Asperger's This book spells out in detail the psychodynamics the author has repeatedly uncovered in Asperger's children adolescents and adults and explores the central factors in the aetiology of Asperger's Disorder There is a section suggesting how Asperger's can be adequately diagnosed from the outside using external descriptive features and more importantly from the inside based on internal psychodynamic processes Finally there is a section outlining psychodynamic treatment approaches to Asperger's children based on their psychodynamics and on which type of Asperger's is present The book includes numerous case illustrations to help the reader appreciate the central psychodynamics that are regularly observed in Asperger's children namely splitting of the self into victim and bully aspects and projective identification into remote objects
