Reporting on Risk Eleanor Singer, Phylliss M. Endreny, 1993-05-18 After acts of airline terrorism air travel tends to drop dramatically yet Americans routinely pursue the far riskier business of driving cars where accidents resulting in death or injury are much more likely to occur *Reporting on Risk* argues that this selective concern with danger is powerfully shaped by the media whose coverage of potentially hazardous events is governed more by a need to excite the public than to inform it Singer and Endreny survey a wide range of print and electronic media to provide an unprecedented look at how hundreds of different hazards are presented to the public from toxic waste and food poisoning to cigarette smoking from transportation accidents to famine and from experimental surgery to communicable diseases Their investigations raise thought provoking questions about what the media tell us about modern risks which hazards are covered and which ignored and how the media determine when hazards should be considered risky Are natural hazards reported differently than man made hazards Is greater emphasis placed on the potential benefits or the potential drawbacks of complex new technologies Are journalists more concerned with reporting on unproven cures or informing the public about preventative measures Do newspapers differ from magazines and television in their risk reporting practices *Reporting on Risk* investigates how the media place blame for disasters and looks at how the reporting of risks has changed in the past twenty five years as such hazards as nuclear power birth control methods and industrial by products have grown in national prominence The authors demonstrate that the media often fail to report on risks until energized by the occurrence of some disastrous or dramatic event the Union Carbide pesticide leak in Bhopal the Challenger explosion the outbreak of famine in Somalia or the failed transplant of a baboon heart to Baby Fae Sustained attention to these hazards depends less on whether the underlying issues have been resolved than on whether they continue to unfold in newsworthy events *Reporting on Risk* examines the accuracy and the amount of information we receive about our environment It offers a critical perspective on how our perceptions of risk as shaped by the media may contribute to misguided individual and public choices for action and prevention in an increasingly complex world The authors probing assessment of how the media report a vast array of risks offers insights useful to journalists policy analysts risk specialists legislators and concerned citizens

Grasping the Nettle Chester A. Crocker, 2005 Among the unwelcome legacies of the past century are a group of conflicts both intrastate and interstate that seem destined never to end From Kashmir to Nagorno Karabakh Colombia to Sudan the Korean Peninsula to the Middle East these deeply entrenched intermittently violent conflicts have so far resisted all outside efforts to resolve them What lessons aside from the apparent futility of mediation can such dismal situations possibly offer As the distinguished contributors to Grasping the Nettle make plain this is not a rhetorical question Unyielding conflicts offer numerous insights not only about the sources of intractability but also about such facets of mediation and conflict management as how to gain leverage when to engage and disengage how to balance competing goals and who to enlist to play supporting roles The first part of this eye opening volume identifies and analyzes the defining characteristics and underlying dynamics of intractable conflicts The second part turns the spotlight on no fewer than eight current cases in each instance chronicling the conflict's evolution evaluating the internal and external factors that have conspired to prevent a settlement and assessing whether past peacemaking initiatives have in fact only aggravated the conflict The conclusion makes the point that even intractable conflicts eventually end and highlights the strategic approaches and tactical steps that have yielded success in the past for mediators and conflict managers from governments international organizations and NGOs

News Now Susan Green, Mark Lodato, B. William Silcock, Carol Schwalbe, 2016-01-08 Debuting in its first edition **News Now** Visual Storytelling in the Digital Age helps today's broadcast journalism students prepare for a mobile interactive

and highly competitive workplace The authors all faculty members of the prestigious Cronkite School of Journalism and Mass Communication bring their real world expertise to a book designed to be a trusted reference for the next generation of broadcast journalists Daily Graphic Elizabeth Ohene,1980-03-14 **Toxic War** Peter Sills,2014-02-15 The war in Vietnam spanning more than twenty years was one of the most divisive conflicts ever to envelop the United States and its complexity and consequences did not end with the fall of Saigon in 1975 As Peter Sills demonstrates in Toxic War veterans faced a new enemy beyond post traumatic stress disorder or debilitating battle injuries Many of them faced a new more pernicious slow killing enemy the cancerous effects of Agent Orange Originally introduced by Dow and other chemical companies as a herbicide in the United States and adopted by the military as a method of deforesting the war zone of Vietnam in order to deny the enemy cover Agent Orange also found its way into the systems of numerous active duty soldiers Sills argues that manufacturers understood the dangers of this compound and did nothing to protect American soldiers Toxic War takes the reader behind the scenes into the halls of political power and industry where the debates about the use of Agent Orange and its potential side effects raged In the end the only way these veterans could seek justice was in the court of law and public opinion Unprecedented in its access to legal medical and government documentation as well as to the personal testimonies of veterans Toxic War endeavors to explore all sides of this epic battle Indian Literary Review ,1953
