Stevens and Jen Chieh Ting Academia Sinica **Tackling Social Exclusion in Europe** Roger Spear, Jacques Defourny, Jean-Louis Laville, 2018-02-06 This book is the result of an international study by leading economists and sociologists from across Europe and North America The response of the new social economy primarily voluntary and co operative sectors to social exclusion and employability in the context of crises of unemployment and the welfare state is of wide international concern This book looks specifically at the growth of enterprises and initiatives whose primary aim is the integration of unemployed and disadvantaged people into work A common framework has been used in each of the country studies thus allowing an interesting international comparative perspective to be developed There is considerable interest in how the third sector is changing internationally in response to rapidly changing work and welfare systems By distilling international experience this book makes an important contribution to debates about new ways of addressing the central issues of unemployment and social exclusion of disadvantaged people in society **Basic Interests** Frank R. Baumgartner, Beth L. Leech, 1998-03-23 A generation ago scholars saw interest groups as the single most important element in the American political system Today political scientists are more likely to see groups as a marginal influence compared to institutions such as Congress the presidency and the judiciary Frank Baumgartner and Beth Leech show that scholars have veered from one extreme to another not because of changes in the political system but because of changes in political science They review hundreds of books and articles about interest groups from the 1940s to today examine the methodological and conceptual problems that have beset the field and suggest research strategies to return interest group studies to a position of greater relevance The authors begin by explaining how the group approach to politics became dominant forty years ago in reaction to the constitutional legal approach that preceded it They show how it fell into decline in the 1970s as scholars ignored the impact of groups on government to focus on more quantifiable but narrower subjects such as collective action dilemmas and the dynamics of recruitment As a result despite intense research activity we still know very little about how groups influence day to day governing Baumgartner and Leech argue that scholars need to develop a more coherent set of research questions focus on large scale studies and pay more attention to the context of group behavior Their book will give new impetus and direction to a field that has been in the academic wilderness too long Voice and Equality Sidney Verba, Kay Lehman Schlozman, Henry E. Brady, 1995-09-26 This book confirms the idea put forth by Tocqueville that American democracy is rooted in civic voluntarism citizens involvement in family work school and religion as well as in their political participation as voters campaigners protesters or community activists The authors analyze civic activity with a massive survey of 15 000 people Multiculturalism in Transit Klaus J. Milich, Jeffrey Peck, 1998-12-01 Multiculturalism is one of the most controversial topics in both the United States and Germany This interdisciplinary collection of essays by German scholars in American Studies and American scholars in German Studies analyze the other from this dual perspective and from their respective disciplines such as literary and cultural studies political science anthropology and history More

particularly they examine multiculturalism in terms of national and ethnic identities as well as gender and race and look at the disciplines and institutions that produce and legitimize discourses on subjects such as minority literatures feminism and the notion of foreignness itself What becomes clear is the fact that careful attention must be paid to the particular conditions and different ideological concepts that shape this term i e the national historical political social and institutional contexts in which it appears circulates and accrues meanings Contributors G Welz T Brennan B Ostendorf R Hof S Lennox A Koenen F Hajek C Gersdorf G H Lenz F Trommler H C Seeba A Seyhan A Hornung B Thomas G O Kvistad H J Puhle
