Beyond Tiananmen Robert L. Suettinger, 2004-05-13 It has been thirteen years since soldiers of the Chinese People's Liberation Army PLA raced into the center of Beijing ordered to recover at any cost the city's most important landmark Tiananmen Square from student demonstrators The U S and other Western countries recoiled in disgust after the horrific incident and the relationship between the U S and China went from amity and strategic cooperation to hostility distrust and misunderstanding Time has healed many of the wounds from those terrible days of June 1989 and bilateral strains have been eased in light of the countries joint opposition to international terrorism Yet China and U S remain locked in opposition as strategic thinkers and military planners on both sides plot future conflict scenarios with the other side as principal enemy Polls indicate that most Americans consider China an unfriendly country and anti American sentiment is growing in China According to Robert Suettinger the calamity in Tiananmen Square marked a critical turning point in U S China affairs In *Beyond Tiananmen* Suettinger traces the turbulent bilateral relationship since that time with a particular focus on the internal political factors that shaped it Through a series of candid anecdotes and observations Suettinger sheds light on the complex and confused decision making process that affected relations between the U S and China between 1989 and the end of the Clinton presidency in 2000 By illuminating the way domestic political ideas beliefs and prejudices affect foreign policymaking Suettinger reveals policy decisions as outcomes of complex processes rather than the results of grand strategic trends He also refutes the view that strategic confrontation between the superpowers is inevitable Suettinger sees considerable opportunity for cooperation and improvement in what is likely to be the single most important bilateral relationship of the twenty first century He cautions however

China Susan L. Shirk, 2007-04-16 Once a sleeping giant China today is the world's fastest growing economy the leading manufacturer of cell phones laptop computers and digital cameras a dramatic turn around that alarms many Westerners But in China The Fragile Superpower Susan L Shirk opens up the black box of Chinese politics and finds that the real danger lies elsewhere not in China's astonishing growth but in the deep insecurity of its leaders China's leaders face a troubling paradox the more developed and prosperous the country becomes the more insecure and threatened they feel Shirk a former Deputy Assistant Secretary of State responsible for China knows many of today's Chinese rulers personally and has studied them for three decades She offers invaluable insight into how they think and what they fear In this revealing book readers see the world through the eyes of men like President Hu Jintao and former President Jiang Zemin We discover a fragile communist regime desperate to survive in a society turned upside down by miraculous economic growth and a stunning new openness to the greater world Indeed ever since the 1989 pro democracy protests in Tiananmen Square and the fall of communism in the Soviet Union Chinese leaders have been haunted by the fear that their days in power are numbered There is a regime afraid of its own citizens and this fear motivates many of their decisions when dealing with the U S and other foreign nations In particular the fervent nationalism of the Chinese people combined with their passionate resentment of Japan and attachment to Taiwan have made relations with these two regions a minefield It is here Shirk concludes in the tangled interactions between Japan Taiwan China and the United States that the greatest danger lies Shirk argues that rising powers such as China tend to provoke wars in large part because other countries mishandle them Unless we understand China's brittle internal politics and the fears that motivate its leaders we face the very real possibility of avoidable conflict with China This book provides that understanding

American Images of China Oliver Turner, 2014-04-16 The United States and China are arguably the most globally consequential actors of the early twenty first century and look set to remain so into the foreseeable future This volume seeks to highlight that American images of China are responsible for constructing certain truths and realities about that country and its people It also introduces the understanding that these images have always been inextricable from the enactment and justification of US China policies in Washington and that those policies themselves are active in the production and reproduction of imagery and in the protection of American identity when seemingly threatened by that of China Demonstrating how past American images of China are vital to understanding the nature and significance of those which circulate today Turner addresses three key questions What have been the dominant American images of China and the Chinese across the full lifespan of Sino US relations How have

historical and contemporary American images of China and the Chinese enabled and justified US China policy What role does US China policy play in the production and reproduction of American images of China Exploring and evaluating a wide ranging variety of sources including films and television programmes newspaper and magazine articles the records and journals of politicians and diplomats and governmental documents including speeches and legal declarations this work will be of great interest to students and scholars of US foreign policy American politics China studies and international relations
