Advances in Information Systems Tatyana Yakhno, 2003-06-30 This volume contains the proceedings of the Second International Conference on Advances in Information Systems ADVIS held in Izmir Turkey 23-25 October 2002. This conference was dedicated to the memory of Prof. Esen Ozkaran. He was a great researcher who made an essential contribution to the development of information systems. Prof. Ozkaran was one of the pioneers of database machine research and database systems in Turkey. This conference was organized by the Computer Engineering department of Dokuz Eylul University in Izmir. This department was established in 1994 by Prof. Ozkaran and he worked there for the last few years of his life. The main goal of the conference was to bring together researchers from all around the world working in different areas of information systems to share new ideas and present their latest results. This time we received 94 submissions from 27 countries. The program committee selected 40 papers for presentation at the conference. During the conference a workshop was organized on the topic New Information Technologies in Education. The invited and accepted contributions cover a large variety of topics: general aspects of information systems, databases and data warehouses, information retrieval, multiagent systems and technologies, distributed and parallel computing, evolutionary algorithms and system programming, and new information technologies in education. The success of the conference was dependent upon the hard work of a large number of people. We gratefully acknowledge the members of the Program Committee who helped to coordinate the process of refereeing all submitted papers.

New Trends in Databases and Information Systems Mykola Pechenizkiy, Marek Wojciechowski, 2012-08-22 Database and information systems technologies have been rapidly evolving in several directions over the past years. New types and kinds of data, new types of applications and information systems to support them raise diverse challenges to be addressed. The so-called big data challenge, streaming data management and processing, social networks and other complex data analysis including semantic reasoning into information systems supporting, for instance, trading negotiations and bidding mechanisms are just some of the emerging research topics. This volume contains papers contributed by six workshops: ADBIS Workshop on GPUs in Databases, GID 2012 Mining Complex and Stream Data, MCS 12 International Workshop on Ontologies meet Advanced Information Systems, OAIS 2012 Second Workshop on Modeling Multi-commodity Trade Data models and processing, MMT 12 1st ADBIS Workshop on Social Data Processing, SDP 12 1st ADBIS Workshop on Social and Algorithmic Issues in Business Support, SAIBS, and the Ph.D. Consortium associated with the ADBIS 2012 conference that report on the recent developments and an ongoing research in the aforementioned areas.
