Kondraivendhan, C. D. Modhera, Indrajit N. Patel, U. Johnson Alengaram, 2025-10-16 This book presents select proceedings of the International Conference on Recent Advances in Structural Engineering RAISE 2024. It covers the developments in structural engineering with a particular focus on building materials relevant to sustainable development. The book delves into three main themes: advanced construction materials, repair and rehabilitation, and interdisciplinary research areas. It also emphasizes the significant applications of the developments under these themes in sustainable environments, fire resistance, and long durable concrete structures. This book also provides in-depth technical discussions and hence it will be a valuable resource for researchers and professionals alike **Recent Advances in Structural Engineering—Vol. 1** B. The book will cover major factors that contribute to the premature deterioration of concrete structures in aggressive environments, factors related to the development of cost-effective concrete mix design to enhance the durability of future structures, and recommendations on improvements in construction practice and workmanship which are necessary to improve the service life of structures. It is anticipated that the themes and suggestions presented in this publication will increase the visibility of research being conducted in India on these crucial topics and give the financial industry insights into
