Advances In Semantic Media Adaptation And Personalization Volume 2:

Advances in Semantic Media Adaptation and Personalization, Volume 2 Marios C. Angelides, Phivos Mylonas, Manolis Wallace, 2009-03-17 The emergence of content and context aware search engines which not only personalize searching and delivery but also the content has caused the emergence of new infrastructures capable of end to end ubiquitous transmission of personalized multimedia content to any device on any network at any time Personalizing and adapting content requires pro

Advances in Semantic Media Adaptation and Personalization, Volume 2 Marios C. Angelides, Phivos Mylonas, Manolis Wallace, 2009-03-17 The emergence of content and context aware search engines which not only personalize searching and delivery but also the content has caused the emergence of new infrastructures capable of end to end ubiquitous transmission of personalized multimedia content to any device on any network at any time Personalizing and adapting content requires pro

Advances in Semantic Media Adaptation and Personalization Marios C. Angelides, 2008-01-04 Realizing the growing importance of semantic adaptation and personalization of media the editors of this book brought together leading researchers and practitioners of the field to discuss the state of the art and explore emerging exciting developments This volume comprises extended versions of selected papers presented at the 1st International Workshop on Semantic Media Adaptation and Personalization SMAP 2006 which took place in Athens in December 2006 **Semantics in Adaptive and Personalized Services** Manolis Wallace, Ioannis Anagnostopoulos, Phivos Mylonas, Mária Bielíková, 2010-02-28 Semantics in Adaptive and Personalised Services initially strikes one as a specific and perhaps narrow domain Yet a closer examination of the term reveals much more On one hand there is the issue of semantics Nowadays this most often refers to the use of OWL RDF or some other XML based ontology description language in order to represent the entities of problem Still semantics may also very well refer to the consideration of the meanings and concepts rather than arithmetic measures regardless of the representation used On the other hand there is the issue of adaptation i e automated re configuration based on some context This could be the network and device context the application context or the user context we refer to the latter case as personalization From a different perspective there is the issue of the point of view from which to examine the topic There is the point of view of tools referring to the algorithms and software tools one can use the point of view of the methods referring to the abstract methodologies and best practices one can follow as well as the point of view of applications referring to successful and pioneering case studies that lead the way in research and innovation Or at least so we thought Based on the above reasoning the editors identified key researchers and practitioners in each of the aforementioned categories and invited them to contribute a corresponding work to this book However as the authors contributions started to arrive the editors also started to realize that although these categories participate in each chapter to different degrees none of them can ever be totally obsolete from them Moreover it seems that theory and methods are inherent in the development of tools and applications and inversely the application is also inherent in the motivation and presentation of tools and methods *Solar*

Cell Technology and Applications A. R. Jha, 2009-10-14 Energy experts predict that wholesale electricity prices could easily rise 35 to 65 percent by 2015 Add to this the growing need for energy independence and the need to reduce carbon emissions and it is very clear that the development of low cost renewable energy such as solar energy is essential for our economy and our national security With t

New Developments in Formal Languages and Applications Gemma Bel-Enguix, M Dolores Jiménez-López, Carlos Martín-Vide, 2008-04-11 The theory of formal languages is widely accepted as the backbone of theoretical computer science It mainly originated from mathematics combinatorics algebra mathematical logic and generative linguistics Later new specializations emerged from areas of either computer science concurrent and distributed systems computer graphics artificial life biology plant development molecular genetics linguistics parsing text searching or mathematics cryptography All human problem solving capabilities can be considered in a certain sense as a manipulation of symbols and structures composed by symbols which is actually the stem of formal language theory Language in its two basic forms natural and artificial is a particular case of a symbol system This wide range of motivations and inspirations explains the diverse applicability of formal language theory and all these together explain the very large number of monographs and collective volumes dealing with formal language theory In 2004 Springer Verlag published the volume *Formal Languages and Applications* edited by Carlos Martín Vide V Mitran and G Păun in the series *Studies in Fuzziness and Soft Computing* 148 which was aimed at serving as an overall course aid and self study material especially for PhD students in formal language theory and applications Actually the volume emerged in such a context it contains the core information from many of the lectures delivered to the students of the International PhD School in Formal Languages and Applications organized since 2002 by the Research Group on Mathematical Linguistics from Rovira i Virgili University Tarragona Spain

Mass Customization for Personalized Communication Environments: Integrating Human Factors Mourlas, Constantinos, Germanakos, Panagiotis, 2009-10-31 This book focuses on the customization of services and communication environments to advance user satisfaction Provided by publisher

Intelligent Techniques and Tools for Novel System Architectures Panagiotis Chountas, Ilias Petrounias, 2008-09-04 The purpose of this volume is to foster and present new directions and solutions in broadly perceived intelligent systems The emphasis is on constructive approaches that can be of utmost importance for a further progress and implementability The volume is focused around a crucial prerequisite for developing and implementing intelligent systems namely to computationally represent and manipulate knowledge both theory and information augmented by an ability to operationally deal with large scale knowledge bases complex forms of situation assessment sophisticated value based modes of reasoning and economic and autonomous system behaviours These challenges exceed the capabilities and performance capacity of current open standards approaches to knowledge representation management and system architectures The intention of the editors and contributors of this volume is to present tools and techniques that can help in filling this gap New system architectures must be devised in response to the needs of exhibiting intelligent behaviour

cooperate with users and other systems in problemsolving discovery access retrievalandmanipulationofawidevariety of data and knowledge and reason under uncertainty in the context of a knowledge based economy and society **Holonic**

Execution: A BDI Approach Jacqueline Jarvis,Dennis Jarvis,Ralph Rönquist,2008-05-30 This book contains the latest research on intelligent holonic execution It presents a conceptual model for Holonic Manufacturing Execution that draws together research threads from both holonics and multi agent systems The book presents the model by mapping it onto two current BDI programming frameworks and uses this for two separate implementations of an execution system for an industrial strength robotic assembly cell This work also introduces the Team Programming paradigm **Advanced**

Computational Intelligence Paradigms in Healthcare - 3 Margarita Sordo,Sachin Vaidya,2008-06-26 This volume details the latest state of the art research on computational intelligence paradigms in healthcare in the intelligent agent environment The book presents seven chapters selected from the rapidly growing application areas of computational intelligence to healthcare systems These include intelligent synthetic characters man machine interface menu generators analysis of user acceptance pictures archiving and communication systems
