Compensating Asbestos Victims Andrea Boggio, 2016-05-23 This book traces the emergence and transformations of asbestos compensation to explore the wider issue of to what extent legal systems have converged in the era of globalization Examining the mechanism by which asbestos compensation is delivered in Belgium England Italy and the United States as well as the cultural forces and actors which contribute to its emergence and transformations the book advances our understanding of how law operates within cultural norms routines and institutional relations of capitalist societies With material gathered from 50 interviews and from primary and secondary sources the author considers law as a cultural

phenomenon national styles of legal culture and the convergence and divergence of legal cultures and law as a form of institutionalized power Human Health and Ecological Integrity Laura Westra, Colin L. Soskolne, Donald W.

Spady, 2012-05-31 The connection between environment and health has been well studied and documented particularly by the World Health Organization. It is now being included in some legal instruments although for the most part caselaw does not explicitly make that connection. Neither the right to life nor the rights to health or to normal development are actually cited in the resolution of cases and in judges' decisions. This volume makes the connection explicit in a broad review of human rights and legal issues associated with public health and the environment. It will be particularly useful as many legal instruments emphasize the right to development without fully discussing the necessary safety and public health aspects and the respect for the ecology of any area where such development often unwanted by local or indigenous communities is to be located. Climate change is another pressing variable that is considered and several chapters address the interface between human health and ecological conditions. Overall the book integrates perspectives from a wide range of disciplines including ethics, ecology, public health and epidemiology and human rights and law **Dangerous Trade** Christopher Sellers, Joseph Melling, 2011-12-22 From anthrax to asbestos to pesticides industrial toxins and pollutants have troubled the world for the past century and longer. Environmental hazards from industry remain one of the world's foremost killers. *Dangerous Trade* establishes historical groundwork for a better understanding of how and why these hazards continue to threaten our shrinking world. In this timely collection an international group of scholars casts a rigorous eye towards efforts to combat these ailments. *Dangerous Trade* contains a wide range of case studies that illuminate transnational movements of risk from the colonial plantations of Indonesia to compensation laws in late 19th century Britain and from the occupational medicine clinics of 1960s New York City to the burning of electronic waste in early twenty first century Uruguay. The essays in *Dangerous Trade* provide an unprecedented broad perspective of the dangers stirred up by industrial activity across the globe as well as the voices raised to remedy them *Dust Inside* Agata Mazzeo, 2020-11-01 Toxic production disrupted lives and contaminated bodies. Care for unacknowledged suffering, incurable cancers and immeasurable losses. This book bears witness to the invisible disasters provoked by the asbestos market worldwide and gives a voice to the communities of survivors who struggle daily in the name of social and environmental justice. Grounded in a profound, touching ethnography, this book offers an original contribution to understanding global health disasters and grassroots health based activism.
