Asia And Global Production Networks Implications For Trade Incomes And Economic Vulnerability:

Asia and Global Production Networks Benno Ferrarini, David Hummels, 2014-10-31 This timely book deploys new tools and measures to understand how global production networks change the nature of global economic interdependence and how that in turn changes our understanding of which policies are appropriate in this new environment Global Production Networks Neil M. Coe, Henry Wai-Chung Yeung, 2015 Globalization and supply chains have re shaped the organization of the global economy in to global production networks The authors provide a clear framework for understanding these developments Revisiting Globalization and the Rise of Global Production Networks S. Javed Maswood, 2017-07-24 This book takes issue with the likening of contemporary globalization to nineteenth century trade interdependence in which the defining feature of contemporary globalization is the spread of global production networks which were notably absent in the past Maswood demonstrates that the emergence of global production networks GPNs was not a result of economic and trade liberalization but instead due to neo protectionist developments in the 1980s that acted as a catalyst to transform Japan s nationally based production networks into the now ubiquitous GPNs Through this case study of Japan the author lays out a case for reconsidering the origins of globalization and explores some of the consequences that are likely to flow from progressive evolutionary transition towards a global economy *Production Networks and Enterprises in East Asia* Ganeshan Wignaraja, 2015-12-10 The book provides a comprehensive examination of patterns and determinants of production networks in East Asia a key driver in the region s global success It provides the reader with an accessible understanding of the theoretical literature on production networks and recent developments in empirical analysis at the industry and firm levels The topics covered in the book include gross trade in parts and components and gravity models trade in value added industry case studies and micro data econometric studies of firm heterogeneity in production networks The micro data econometric studies explore key aspects of the heterogeneity of firms in East Asian production networks such as technological capability the entry of small and medium enterprises into production networks business use of free trade agreements and access to credit Blending new sources of data empirical tools and econometric methods this book is highly recommended for readers who seek to understand the workings of the complex web of production networks in East Asia

Asian Development Outlook 2014 Update Asian Development Bank, 2014-09-01 Developing Asia is maintaining steady growth momentum Despite recovery in the major industrialized economies falling short of expectations the region is on track to meet its favorable forecasts as policy stabilizes investment in the People s Republic of China and signs emerge of a long awaited turnaround in India Inflation is held in check across most regional economies by benign international commodity prices subdued domestic demand and prudent policy Even if global liquidity tightens earlier in 2015 than anticipated its effect on developing Asia should be modest Asian Development Outlook 2014 Update reviews global value chains and how these cross border production networks have enhanced income and employment in East and Southeast Asia It considers what

policy makers can do to encourage their improvement and spread to other parts of Asia and the Pacific *International Relations of East Asia* Xiaoming Huang, 2019-12-28 East Asia's rapidly changing role in international security the global economy development and global governance are expertly accounted for in this much needed state of the art text Xiaoming Huang offers an engaging and informed account of the key concepts issues and actors working in this area Ranging from the region's history to culture and a comparative assessment of the region's states this text is informed throughout by a compelling theoretical framework In so doing it unpicks the often complex relationships both at the domestic level and externally Only with this understanding is it possible to make sense of the region's complex relationships both internally and externally Structured around key concepts in international relations of war and peace economic development and increased contemporary security threats this text offers an empirically rich engaging account of the changing fortunes of East Asia

How Weak Regionalism in East Asia Works Well Luna Ge Lai, 2024-10-31 This book investigates the reasons why regionalism in East Asia has been much weaker than in Western Europe and North America It focuses particularly on economic factors examining the regional and global linkages of production networks Through a focused exploration of regional and global production networks it argues that East Asia was not as regionally concentrated as was Western Europe or North America lacking a regionally oriented productional basis to support the institutional arrangement of East Asia as a stand alone economic community Moreover the regional production networks of each national economy in the region are influenced by a different set of value added components from different global and regional origins This divergence in their positions accounts for the mushrooming of divergent initiatives and projects for regional institutional arrangement Finally the institutional choices of the states to join Comprehensive and Progressive Agreement for Trans Pacific Partnership CP TPP and or Regional Comprehensive Economic Partnership RCEP are found to be strongly influenced by the sectoral focuses and priorities of their economies Demonstrating how the unique economic factors of each nation override other considerations for greater regional integration this book will be a valuable resource to students and scholars of international trade Asian politics and economics

Asian Economic Integration in an Era of Global Uncertainty Shiro Armstrong, Tom Westland, 2018-01-08 The Pacific Trade and Development PAFTAD conference series has been at the forefront of analysing challenges facing the economies of East Asia and the Pacific since its first meeting in Tokyo in January 1968 The 38th PAFTAD conference met at a key time to consider international economic integration Earlier in the year the people of the United Kingdom voted to leave the European Union and the United States elected Donald Trump as their next president on the back of an inward looking America First promise Brexit and President Trump represent a growing and worrying trend towards protectionism in the North Atlantic countries that have led the process of globalisation since the end of the Second World War The chapters in the volume describe the state of play in Asian economic integration but more importantly look forward to the region's future and the role it might play in defending the global system that has underwritten its historic rise

Asia has the potential to stand as a bulwark against the dual threats of North Atlantic protectionism and slowing trade growth but collective leadership will be needed regionally and difficult domestic reforms will be required in each country

Innovation, Competitiveness, and Development in Latin America Edmund Amann, Paulo N. Figueiredo, 2024 Innovation Competitiveness and Development in Latin America provides a balanced and topical analysis of the successes and failures of development policy in post war Latin America Across nineteen chapters experts in the economics and policy of Latin American development and policy identify the challenges at hand They explore why the region is caught in a middle income trap where structural impediments frustrate the achievement of accelerated and sustainable growth At the same time potential actions are suggested for creating lasting progress With fresh insights grounded in the reality of modern day Latin America this book offers scholars and professionals a crucial window into Latin America s long term developmental trajectory

Interconnected Worlds Henry Wai-Chung Yeung, 2022-06-28 The global electronics industry is one of the most innovation driven and technology intensive sectors in the contemporary world economy From semiconductors to end products complex transnational production and value generating activities have integrated diverse macro regions and national economies worldwide into the interconnected worlds of global electronics This book argues that the current era of interconnected worlds started in the early 1990s when electronics production moved from systems dominated by lead firms in the United States Western Europe and Japan towards increasingly globalized and cross macro regional electronics manufacturing centered in East Asia By the 2010s this co evolution of production network complexity transformed global electronics through which lead firms from South Korea Taiwan and China integrated East Asia into the interconnected worlds of electronics production across the globe Drawing on literature on the electronics industry new empirical material comprising custom datasets and extensive personal interviews this book examines through a network approach the co evolution of globalized electronics production centered in East Asia across different national economies and sub national regions With comprehensive analysis up to 2021 Yeung analyzes the geographical configurations where organizational strategies how and causal drivers why of global production networks setting a definitive benchmark into the dynamic transformations in global electronics and other globalized industries The book will serve as a crucial resource for academic and policy research offering a conceptual empirically driven grounding in the theory of these networks that has become highly influential across the social sciences
