Asian Maritime Strategies Navigating Troubled Waters:

Asian Maritime Strategies Bernard D Cole, 2013-10-15 This book is concerned with both the national security concerns of Asian maritime nations and the security of the Asian maritime commons These are defined as the Pacific and Indian Oceans and associated seas bays and gulfs with their included sea lines of communication SLOCs The most useful geographical designation for maritime Asia is the Indo Pacific Bernard Cole provides both a survey of the maritime strategies of the primary nations of the Indo Pacific region and an evaluation of the domestic and international politics that drive those strategies The United States Canada Russia Japan North Korea South Korea China the Philippines Brunei Indonesia Vietnam Singapore Malaysia Myanmar India Pakistan Iran the smaller Indian Ocean and Persian Gulf states are all surveyed and analyzed The United States Japan China and India not surprisingly draw the most attention given their large modern navies and distant strategic reach The author concludes that the United States remains the dominant maritime power in this huge region stretching from Canada to the Persian Gulf despite its lack of a traditionally strong merchant marine U S maritime power remains paramount due primarily to its dominant navy The Chinese naval modernization program deservedly receives a good deal of public attention but Cole argues that on a day to day basis the Japanese Maritime Self Defense Force as its navy is named is the most powerful maritime force in Far Eastern waters while the modernizing Indian Navy potentially dominates the Indian Ocean In fact a focus of this work is the exemplary description of all the region's navies with the author noting the naval arms race that is underway particularly in the area of submarine acquisition Cole is careful to couch this phenomenon in the regional concerns about Chinese naval expansion and the desire to ensure a continued massive U S naval presence The current naval developments in the region evince elements of a naval arms race but lack the coherent maritime strategies to make naval developments dangerous to regional peace and security Most telling will be whether United States power and focus remain on the region while adjusting to continued Chinese maritime power in a way acceptable to both nations No other current or recent work provides such a complete description of the Indo Pacific region's navies and maritime strategies while analyzing the current and future impact of those forces **Parameters** ,2015 **Great Powers, Grand Strategies** Anders Corr, 2018-01-15 Great Powers Grand Strategies offers the analysis of a dozen experts on the big picture approaches to the South China Sea dispute By exploring the international dimensions of this regional hotspot Gordon Chang Bernard Cole James Fanell Bill Hayton and others examine how the military diplomatic and economic strategies of the major global actors have both contributed to solutions and exacerbated the potential for conflict As editor of this volume Anders Corr seeks to juxtapose the grand strategies of the great powers to determine the likely outcomes of the South China Sea dispute as well as evaluate the ways to possibly defuse tensions in the region **The New Age of Naval Power in the Indo-Pacific** Catherine L. Grant, Alessio Patalano, James A. Russell, 2023 Competition at sea is back as a central issue of international security Today the US led maritime order and the freedom to use the ocean as a vast maneuver space to access

different markets and theaters stands contested Nowhere is the urgency to address state on state competition at sea more strongly felt than in the Indo Pacific region where freedom of navigation stands challenged by regional states continuous investments in naval power and the renewed political will to use it The international groups of distinguished contributors to this volume survey and analyze the implications of the return of naval power as a critical consideration of international relations in the Indo Pacific region Catherine L Grant Alessio Patalano and James A Russell develop an original framework in which five factors of influence help explain how and why naval power matters in this pivotal part of the world for cooperation coercion and competition The chapters also provide historical background outline key issues and conduct a close examination of key subregions This book will be read by both academics and policy makers alike seeking to navigate the complexity of maritime security and regional affairs Assessing Maritime Power in the Asia-Pacific Greg Kennedy, Harsh V.
