Ecologies of Translation in East and South East Asia, 1600-1900 Li Guo,Patricia Sieber,Peter Kornicki,2025-10-01 This ground breaking volume on early modern inter Asian translation examines how translation from plain Chinese was situated at the nexus between on the one hand the traditional standard of biliteracy characteristic of literary practices in the Sinographic sphere and on the other practices of translational multilingualism competence in multiple spoken languages to produce a fully localized target text Translations from plain Chinese are shown to carve out new ecologies of translations that not only enrich our understanding of early modern translation practices across the Sinographic sphere but also demonstrate that the transregional uses of a non alphabetic graphic technology call for different models of translation theory
