Aspects of Automatic Text Analysis Alexander Mehler, Reinhard Köhler, 2007-06-24 The significance of natural language texts as the prime information structure for the management and dissemination of knowledge is as the rise of the web shows still increasing Making relevant texts available in different contexts is of primary importance for efficient task completion in academic and industrial settings Meeting this demand requires automatic form and content based processing of texts which enables to reconstruct or even to explore the dynamic relationship of language system text event and context type The rise of new application areas disciplines and methods e g text and web mining testify to the importance of this task Moreover the growing area of new media demands the further development of methods of text analysis with respect to their computational linguistic information theoretical and mathematical underpinning This book contributes to this task It collects contributions of authors from a multidisciplinary area who focus on the topic of automatic text analysis from several i e linguistic mathematical and information theoretical perspectives It describes methodological as well as methodical foundations and collects approaches in the field of text and corpus linguistics In this sense it contributes to the computational linguistic and information theoretical grounding of automatic text analysis

**Legal Knowledge Representation: Automatic Text Analysis in Public International and European Law** Erich Schweighofer, 1999-10-19 This volume is a presentation of all methods of legal knowledge representation from the point of view of jurisprudence as well as computer science A new method of automatic analysis of legal texts is presented in four case studies Law is seen as an information system with legally formalised information processes The achieved coverage of legal knowledge in information retrieval systems has to be followed by the next step conceptual indexing and automatic analysis of texts Existing approaches of automatic knowledge representations do not have a proper link to the legal language in information systems The concept based model for semi automatic analysis of legal texts provides this necessary connection The knowledge base of descriptors context sensitive rules and meta rules formalises properly all important passages in the text corpora for automatic analysis Statistics and self organising maps give assistance in knowledge acquisition The result of the analysis is organised with automatically generated hypertext links Four case studies show the huge potential but also some drawbacks of this approach

**Automatic Indexing and Abstracting of Document Texts** Marie-Francine Moens, 2000-03-31 Automatic Indexing and Abstracting of Document Texts summarizes the latest techniques of automatic indexing and abstracting and the results of their application It also places the techniques in the context of the study of text manual indexing and abstracting and the use of the indexing descriptions and abstracts in systems that select documents or information from large collections Important sections of the book consider the development of new techniques for indexing and abstracting The techniques involve the following using text grammars learning of the themes of the texts including the identification of representative sentences or paragraphs by means of adequate cluster algorithms and learning of classification patterns of texts In addition the book is an
