## Aspects Of Bilingualism:

**Cognitive Aspects of Bilingualism** Istvan Kecskes, Liliana Albertazzi, 2007-08-19 A unique feature of this book is that chapters favor that line of cognitive linguistics which makes a clear distinction between real world and projected world. Information conveyed by language must be about the projected world. Both the experimental results and the systematic claims in this volume call for a weak form of Whorfianism. Also chapters add some relatively unexplored issues of bilingualism to the well known ones such as gender systems in the bilingual mind context and task synergic concepts blending the relationship between lexical categorization and ontological categorization among others. Aspects of Bilingualism Michel Paradis, 1978. Language Contact and Linguistic Aspects of Bilingualism Longxing Wei, 2024-07-24 This book consolidates earlier insights and proposes a model of contact linguistics and an innovative approach to the study of bilingualism. It explores the nature of major language contact phenomena especially lexical borrowing mixed languages bilingual lexical and grammatical processing and representations second language acquisition codeswitching and interlanguage. It examines the universal principles governing grammatical structures of languages in contact and differentiates the lexical and grammatical features of morphemes as outcomes of language contact. The proposed approach describes and explains some outstanding linguistic aspects of bilingualism with a focus on the mechanisms of the bilingual mind during bilingual processing and production at several levels of abstract lexical structure. Abundant naturally occurring examples support the claim that the languages in contact are never equally activated and that language specific abstract entries in the bilingual mental lexicon are in contact resulting in mutual influence during codeswitching second language learning and interlanguage development.

**Key Issues in Bilingualism and Bilingual Education** Colin Baker, 1988 The book looks at world wide evidence on issues surrounding bilingualism and bilingual education. These issues include the relationship between bilingualism and intelligence the advantages and disadvantages of bilingual education and the role of attitude and motivation in bilingualism.

**Bilinguality and Bilingualism** Josiane F. Hamers, Michel Blanc, 2000-02-17 This updated and revised edition of Hamers and Blanc's successful textbook presents state of the art knowledge about languages in contact from individual bilingualism or bilinguality to societal bilingualism. It is both multi and interdisciplinary in approach and analyses bilingualism at individual interpersonal and societal levels. Linguistic cognitive and sociocultural aspects of bilingual development are explored as are problems such as bilingual memory and polyglot aphasia. Hamers and Blanc analyse the relationship between culture identity and language behaviour in multicultural settings as well as the communication strategies in interpersonal and intergroup relations. They also propose theoretical models of language processing and development which are then applied to bilingual behaviour. Other topics reviewed include language shift pidgins and creoles language planning and bilingual education. This book will be invaluable to students teachers and scholars interested in languages in contact in a range of disciplines including psycholinguistics linguistics the social sciences education and language planning. *The*

*Bilingualism Or Not* Tove Skutnabb-Kangas, 1981 This book deals with bilingualism particularly as it relates to migrants and indigenous minorities The book begins with a purely linguistic coverage of bilingualism and then deals with the prerequisites and consequences of bilingualism from the perspectives of psychology and pedagogy
