Asserting Native Resilience Pacific Rim Indigenous Nations Face The Climate Crisis:

Asserting Native Resilience Zoltán Grossman, Alan Parker, 2012 Indigenous nations are on the front line of the climate crisis. With cultures and economies among the most vulnerable to climate-related catastrophes, Native peoples are developing twenty-first century responses to climate change that serve as a model for Native and non-Native communities alike. Native American tribes in the Pacific Northwest and Indigenous peoples around the Pacific Rim have already been deeply affected by droughts, flooding, reduced glaciers and snowmelts, seasonal shifts in winds and storms, and the northward movement of species on the land and in the ocean. Using tools of resilience, Native peoples are creating defenses to strengthen their communities, mitigate losses, and adapt where possible. *Asserting Native Resilience* presents a rich variety of perspectives on Indigenous responses to the climate crisis, reflecting the voices of more than twenty contributors, including tribal leaders, scientists, scholars, and activists from the Pacific Northwest, British Columbia, Alaska, and Aotearoa New Zealand and beyond. Also included is a resource directory of Indigenous governments, NGOs, and communities, and a community organizing booklet for use by Northwest tribes.

Religion and Culture in Native America Suzanne Crawford O'Brien, 2020-03-10 *Religion and Culture in Native America* presents an introduction to a diverse array of Indigenous religious and cultural practices in North America, focusing on those issues in which tribal communities themselves are currently invested. These topics include climate change, water rights, the protection of sacred places, the reclaiming of Indigenous foods, health and wellness, social justice, and the safety of Indigenous women and girls. Locating such contemporary challenges within their historical religious and cultural contexts illuminates how Native communities' responses to such issues are not simply political but deeply spiritual, informed by sacred traditions, ethical principles, and profound truths. In collaboration with renowned ethnographer and scholar of Native American religious traditions, Inés Talamantez, Suzanne Crawford O'Brien abandons classical categories typically found in religious studies textbooks and challenges essentialist notions of Native American cultures to explore the complexities of Native North American life. Key features of this text include: Consideration of Indigenous religious traditions within their historical, political, and cultural contexts; Thematic organization emphasizing the concerns and commitments of contemporary tribal communities; Maps and images that help to locate tribal communities and illustrate key themes; Recommendations for further reading and research. Written in an engaging narrative style, this book makes an ideal text for undergraduate courses in Native American Religions, Religion and Ecology, Indigenous Religions, and World Religions.

Governing the Palm Oil Industry Patrick O'Reilly, Helena Varkkey, 2024-08-23

This book examines how different countries across Southeast Asia and Latin America respond to the emergence and expansion of the lucrative yet controversial palm oil industry, paying attention to how national policy and governance regimes are shaping this global industry. With its historic roots in Southeast Asia, oil palm cultivation continues to expand beyond its historical centres. In Latin America, many countries are now developing their own policies to promote and govern oil palm cultivation. This book provides a unique examination of how different countries strive to strike a balance between developmental and environmental concerns through case studies on Indonesia, Malaysia, the Philippines, Thailand, Colombia, Brazil, Ecuador, Honduras, and Mexico, and an outlook for the industry's prospects in Africa. This book applies an assemblage approach to draw out lessons on the global challenges posed by the industry and how differing national governance regimes and communities might respond to them. Rather than a single global industry, the book unveils a complex arrangement of national and even local palm oil assemblages, indicating that there is more than one way to do palm oil. In doing so, the book contributes to a better understanding of the drivers and processes that shape the governance of the

industry both in different nations and globally This book will be of great interest to students and scholars of the palm oil industry as well as those interested in natural resource governance sustainable agriculture conservation environmental justice and environmental and development policy more broadly
