Assessing The Generic Outcomes Of College Selections From Assessment Measures:

Assessing the Generic Outcomes of College Gary R. Pike, 2011-07-20 Any practitioner in the field faces questions addressed in this collection. Regardless of the instruments available at an institution, consideration of the analyses offered here will help in the understanding and presentation of test results. Book jacket *Assessment for Excellence* Alexander W. Astin, Anthony Lising Antonio, 2012-07-13 The second edition of *Assessment for Excellence* arrives as higher education enters a new era of the accountability movement. In the face of mandates such as results based funding and outcomes based accreditation, institutions and assessment specialists are feeling increasingly pressured to demonstrate accountability to external constituencies. The practice of assessment under these new accountability pressures takes on special significance for the education of students and the development of talent across the entire higher education system. This book introduces a talent development approach to educational assessment as a counter to prevailing philosophies illustrating how contemporary practices are unable to provide institutions with meaningful data with which to improve educational outcomes. It provides administrators, policymakers, researchers, and analysts with a comprehensive framework for developing new assessment programs to promote talent development and for scrutinizing existing policies and practices. Written for a wide audience, the book enables the lay reader to quickly grasp the imperatives of a properly designed assessment program and also to gain adequate statistical understanding necessary for examining current or planned assessment policies. More advanced readers will appreciate the technical appendix for assistance in conducting statistical analyses that align with a talent development approach. In addition, institutional researchers will benefit from sections that outline the development of appropriate student databases. **Assessing Student Learning Outcomes in Higher Education** Hamish Coates, Olga Zlatkin-Troitschanskaia, Hans Anand Pant, 2018-12-07 This book examines important advances and offers a realistic image of the state of the art in student learning outcomes assessment in higher education, a field close to the core of nearly every higher education institution. Producing sound information on what students know and can do is critical to higher education practitioners and future social prosperity. Spanning international, national, and institutional developments, the book presents methodological and empirical insights, highlights research challenges, and showcases the enormous progress made in recent years. The book will be of interest to researchers in education assessment and neighbouring fields and stakeholders like institutional leaders, teachers, and graduate employers looking for better insight on returns. Governments searching for information to assist with funding and regulation and members of the public wanting more clarity about outcomes and public investment.
