Between Colliding Worlds Between Colliding Worlds:

Between Colliding Worlds Jonathan Malloy, Institute of Public Administration of Canada, 2003-01-01 Jonathan Malloy's *Between Colliding Worlds* examines the relationship between governments and external activists through a comparative study of policy units dedicated to aboriginal and women's issues in Australia and Canada. Malloy identifies these units or special policy agencies as sitting on the boundary between the world of permanent public servants and that of collective social movements working for broad social and political change. These agencies at once represent the interests of social movements to government while simultaneously managing relations with social movements on behalf of government and thus operate in a state of permanent ambiguity. Malloy contends that rather than criticizing these agencies for their inherently contradictory nature we must reconsider them as effectively dealing with the delicate issue of bridging social movements with state politics. In other words, the very existence of these special policy agencies provides a forum for social movements and the state to work out their differences. Relying heavily on interviews with public servants and external activists, Malloy argues convincingly that special policy agencies, despite or because of their ambiguous relationship to different communities, make critical contributions to governance.

Colliding Worlds Arthur I. Miller, 2014-06-09 A dazzling look at the artists working on the frontiers of science. In recent decades, an exciting new art movement has emerged in which artists utilize and illuminate the latest advances in science. Some of their provocative creations—a live rabbit implanted with the fluorescent gene of a jellyfish, a gigantic glass and chrome sculpture of the Big Bang—pictured on the cover—can be seen in traditional art museums and magazines, while others are being made by leading designers at Pixar, Google's Creative Lab, and the MIT Media Lab. In *Colliding Worlds*, Arthur I. Miller takes readers on a wild journey to explore this new frontier. Miller, the author of *Einstein*, *Picasso*, and other celebrated books on science and creativity, traces the movement from its seeds a century ago, when Einstein's theory of relativity helped shape the thinking of the Cubists, to its flowering today. Through interviews with innovative thinkers and artists across disciplines, Miller shows with verve and clarity how discoveries in biotechnology, cosmology, quantum physics, and beyond are animating the work of designers like Neri Oxman, musicians like David Toop, and the artists in residence at CERN's Large Hadron Collider. From NanoArt to Big Data, Miller reveals the extraordinary possibilities when art and science collide.

Tales of Two Cities Sylvia Bashevkin, 2011-11-01 In the age of globalization, state restructuring is changing the political landscape. How does reshaping local government affect citizen involvement in public life? As cities move between centralized and decentralized governance and conservative and progressive leadership, what brings out the best and the worst in civic engagement? In this thought-provoking book, Sylvia Bashevkin examines the consequences of divergent restructuring experiences in London and Toronto. By focusing on the forced amalgamation of local boroughs in Toronto and the creation of a new metropolitan authority in London, *Tales of Two Cities* explores the fallout for women as urban citizens. Ultimately, context is crucial to whether municipal change signals pessimism or promise. Clear

insightful and prescient *Tales of Two Cities* will appeal to those interested in civic affairs political inclusion and the future of democracy in major urban centres

Colliding Worlds Simone Marchi, 2021-06-24 Simone Marchi presents the emerging story of how cosmic collisions shaped both the solar system and our own planet from the creation of the Moon to influencing the evolution of life on Earth The Earth emerged out of the upheaval and chaos of massive collisions in the infancy of the Solar System more than four billion years ago The largest of these events sent into orbit a spray of molten rocks out of which the Moon coalesced As in ancient mythological tales this giant catastrophe marks the birth of our planet as we know it Space exploration has shown that signs of ancient collisions are widespread in the Solar System from the barren and once habitable Mars to the rugged asteroids On Earth these signs are more subtle but still cataclysmic such as the massive asteroid strike which likely sparked the demise of the dinosaurs and many other forms of life some 66 million years ago Signatures of even more dramatic catastrophes are concealed in ancient rocks These events wreaked havoc on our planet's surface influencing global climate and topography while also enriching the Earth with gold and other rare elements And recently modern science is finding that they could even have contributed to developing the conditions conducive to life In *Colliding Worlds* Simone Marchi explores the key role that collisions in space have played in the formation and evolution of our solar system the development of planets and possibly even the origin of life on Earth Analysing our latest understanding of the surfaces of Mars and Venus gleaned from recent space missions Marchi presents the dramatic story of cosmic collisions and their legacies

The Carpenter's Son Ron W. Simmons, 2017-08-09 What is humanity's ultimate destiny Could there be life beyond the grave What is genuine spirituality These questions and many more are answered by a carpenter's son Jesus born in ancient Judaea two thousand years ago He healed thousands yet never received medical training He taught in streets homes and temples yet never achieved scholarly status He demanded perfection yet chose the imperfect to follow him He spoke of the arrival of an eternal kingdom yet he never ran for political office or led a nation He spoke of peace and love yet led the greatest counter revolutionary effort in human history Despised by his critics and revered by society's lowest members Jesus still speaks to our deficiencies as well as our weaknesses and assures a redemption we could never achieve on our own Out of an original rebellion we all face a self imposed defeat by pointlessly attempting to establish our own kingdoms despite confronting the same abysmal fate Yet God has achieved the greatest comeback in history by conquering death and in doing so has prepared for us a victory we could not possibly imagine for to lose all is to gain all

Politics, Values, and National Socialism Aurel Kolnai, 2017-07-28 The essays in this collection spanning 1925 to 1970 confirm Aurel Kolnai's place as one of the great conservative theorists of the twentieth century Kolnai carefully analyzes the leading intellectual positions and thinkers of his day the dominant social movements and the prevailing moral influences psychoanalysis fascism and National Socialism He documents how they run counter to the architecture of civilization Kolnai is relatively unknown outside philosophical circles but Politics Values and National Socialism provides an overview of his moral philosophy In most moral philosophy books one finds pages devoted to the major

theories of ethics This volume is different It seeks to address the larger moral question of what kind of thought works against morality and by implication how one can defend morality Eager to protect the surviving islands of Liberal Civilization Kolnai's concern is really one of theory He shows that much of what passes for moral theory is subversive of moral order All who think that totalitarianism is a permanent threat and who suspect that ideas can quickly be dangerously distorted in times of social unrest will find plenty of clarifying ideas in this volume Femocratic Administration Tammy Findlay, 2015-01-01
