

A photograph of several tall, cylindrical industrial smokestacks or chimneys. They are covered in a thick layer of rust, giving them a dark brown, textured appearance. The stacks are arranged in a diagonal line, receding from the foreground towards the background. The sky is a pale, overcast grey.

Beyond Rust Allen Dieterich-Ward, 2015-10-21 *Beyond Rust* chronicles the rise fall and rebirth of metropolitan Pittsburgh an industrial region that once formed the heart of the world's steel production and is now touted as a model for reviving other hard hit cities of the Rust Belt Writing in clear and engaging prose historian and area native Allen Dieterich Ward provides a new model for a truly metropolitan history that integrates the urban core with its regional hinterland of satellite cities white collar suburbs mill towns and rural mining areas Pittsburgh reached its industrial heyday between 1880 and 1920 as vertically integrated industrial corporations forged a regional community in the mountainous Upper Ohio River Valley Over subsequent decades metropolitan population growth slowed as mining and manufacturing employment declined Faced with economic and environmental disaster in the 1930s Pittsburgh's business elite and political leaders developed an ambitious program of pollution control and infrastructure development The public private partnership behind the Pittsburgh Renaissance as advocates called it pursued nothing less than the selective erasure of the existing social and physical environment in favor of a modernist functionally divided landscape a goal that was widely copied by other aging cities and one that has important ramifications for the broader national story Ultimately the Renaissance vision of downtown skyscrapers sleek suburban research campuses and bucolic regional parks resulted in an uneven transformation that tore the urban fabric while leaving deindustrializing river valleys and impoverished coal towns isolated from areas of postwar growth *Beyond Rust* is among the first books of its kind to continue past the collapse of American manufacturing in the 1980s by exploring the diverse ways residents of an iconic industrial region sought places for themselves within a new economic order

Beyond Rust Allen Dieterich-Ward, 2016 *Beyond Rust* chronicles the rise fall and rebirth of metropolitan Pittsburgh an industrial region that once formed the heart of the world's steel production and is now touted as a model for reviving other hard hit cities of the Rust Belt Writing in clear and engaging prose historian and area native Allen Dieterich Ward provides a new model for a truly metropolitan history that integrates the urban core with its regional hinterland of satellite cities white collar suburbs mill towns and rural mining areas Pittsburgh reached its industrial heyday between 1880 and 1920 as vertically integrated industrial corporations forged a regional community in the mountainous Upper Ohio River Valley Over subsequent decades metropolitan population growth slowed as mining and manufacturing employment declined Faced with economic and environmental disaster in the 1930s Pittsburgh's business elite and political leaders developed an ambitious program of pollution control and infrastructure development The public private partnership behind the Pittsburgh Renaissance as advocates called it pursued nothing less than the selective erasure of the existing social and physical environment in favor of a modernist functionally divided landscape a goal that was widely copied by other aging cities and one that has important ramifications for the broader national story Ultimately the Renaissance vision of downtown skyscrapers sleek suburban research campuses and bucolic regional parks resulted in an uneven transformation that tore the

urban fabric while leaving deindustrializing river valleys and impoverished coal towns isolated from areas of postwar growth Beyond Rust is among the first books of its kind to continue past the collapse of American manufacturing in the 1980s by exploring the diverse ways residents of an iconic industrial region sought places for themselves within a new economic order

Making Industrial Pittsburgh Modern Edward K. Muller, Joel A. Tarr, 2019-10-22 Pittsburgh's explosive industrial and population growth between the mid nineteenth century and the Great Depression required constant attention to city building Private profit oriented firms often with government involvement provided necessary transportation energy resources and suitable industrial and residential sites Meeting these requirements in the region's challenging hilly topographical and riverine environment resulted in the dramatic reshaping of the natural landscape At the same time the Pittsburgh region's free market private enterprise emphasis created socio economic imbalances and badly polluted the air water and land Industrial stagnation temporarily interrupted by wars and then followed deindustrialization inspired the formation of powerful public private partnerships to address the region's mounting infrastructural economic and social problems The sixteen essays in Making Industrial Pittsburgh Modern examine important aspects of the modernizing efforts to make Pittsburgh and Southwestern Pennsylvania a successful metropolitan region The city building experiences continue to influence the region's economic transformation spatial structure and life experience

Communities of Resistance and Resilience in the Post-Industrial City Daniel Holland, 2024-08-01 This book is about the grassroots community revitalization movement in Pittsburgh Pennsylvania and Lyon France between 1980 and 2010 an extension of the post WWII civil rights campaign that is rarely considered It tells the story of residents' attempts to improve their communities through social capital or people power In positive ways citizens created vibrant attractive neighborhoods But their actions also generated unintended consequences such as high real estate prices and minority displacement that threatened to unravel their hard work Communities of Resistance and Resilience is an ethnographic survey that relies on oral histories archival research on the ground site surveys and the author's personal experience as a neighborhood reinvestment practitioner for more than 30 years It brings to life stories that would otherwise remain obscured such as the lingering impact of the March for Equality and Against Racism organized in Lyon in 1983 and the formation of the Pittsburgh Community Reinvestment Group in Pittsburgh in 1988 both of which launched national movements This is of great use to scholars of transatlantic history as well as a general audience interested in modern social movements in the United States and France

Remaking the Rust Belt Tracy Neumann, 2016-06-28 Remaking the Rust Belt tells the story of how local leaders throughout the Rust Belt adapted internationally circulating ideas about postindustrial redevelopment to create the jobs and amenities they believed would attract middle class professionals but in so doing widened and deepened economic inequality among urban residents

Industrial Heritage and Regional Identities Christian Wicke, Stefan Berger, Jana Golombek, 2018-04-09 Heritage is not what we see in front of us it is what we make of it in our heads Heritage sites have been connected to a range of

identarian projects both spatial and non spatial One of the most common links with heritage has been national identity This book stresses that heritage has developed powerful links to regional and local identities Contributors deal explicitly with regions of heavy industry in different parts of the world exploring non spatial forms of identity including class religious ethnic racial gender and cultural identities In many heritage sites non spatial forms of identity are interlinked with spatial ones Civil society action has been important in representations of regional identities and industrial heritage campaigns Region branding seems to determine the ultimate success of industrial heritage a process that is closely connected to the marketing of regions to provide a viable economic future and attract tourism to the region Selected case studies on coal and steel producing regions in this book provide the first global survey of how regions of heavy industry deal with their industrial heritage and what it means for regional identity and region branding This book draws a range of powerful conclusions about the path dependency of particular forms for post industrial regional identity in former regions of heavy industry It highlights both commonalities and differences in the strategies employed with regard to the regions industrial heritage This book will appeal to lecturers students and scholars in the fields of heritage management industrial studies and cultural geography

Chicago's Industrial Decline Robert Lewis, 2020-12-15 In Chicago's Industrial Decline Robert Lewis charts the city's decline since the 1920s and describes the early development of Chicago's famed and reviled growth machine Beginning in the 1940s and led by local politicians downtown business interest financial institutions and real estate groups place dependent organizations in Chicago implemented several industrial renewal initiatives with the dual purpose of stopping factory closings and attracting new firms in order to turn blighted property into modern industrial sites At the same time a more powerful coalition sought to adapt the urban fabric to appeal to middle class consumption and residential living As Lewis shows the two aims were never well integrated and the result was on going disinvestment and the inexorable decline of Chicago's industrial space By the 1950s Lewis argues it was evident that the early incarnation of the growth machine had failed to maintain Chicago's economic center in industry Although larger economic and social forces specifically competition for business and for residential development from the suburbs in the Chicagoland region and across the whole United States played a role in the city's industrial decline Lewis stresses the deep incoherence of post WWII economic policy and urban planning that hoped to square the circle by supporting both heavy industry and middle to upper class amenities in downtown Chicago

Postindustrial DIY Daniel Campo, 2024-02-13 Chronicles grassroots efforts to recover rebuild and enjoy architecturally iconic but economically obsolete places in the American Rust Belt A pioneering Detroit automobile factory A legendary iron mill at the edge of Pittsburgh A campus of concrete grain elevators in Buffalo Two monumental train stations one in Buffalo the other in Detroit These once noble sites have since fallen from their towering grace As local elected leaders did everything they could to destroy what was left of these places citizens saw beauty and utility in these industrial ruins and felt compelled to act Postindustrial DIY tells their stories The culmination of more than a dozen years of on the ground

investigation ethnography and historical analysis author and urbanist Daniel Campo immerses the reader in this postindustrial landscape weaving the perspectives of dozens of DIY protagonists as well as architects planners and preservationists Working without capital expertise and sometimes permission in a milieu dominated by powerful political and economic interests these do it yourself actors are driven by passion and a sense of civic duty rather than by profit or political expediency They have craftily remade these sites into collective preservation projects and democratic grounds for arts and culture environmental engagement regional celebrations itinerant play and in the moment constructions Their projects are generating excitement about the prospect of Rust Belt life even as they often remain invisible to the uninformed passerby and fall short of professional preservation or environmental reclamation standards Demonstrating that there is no such thing as a site that is too far gone to save or reuse Postindustrial DIY is rich with case studies that demonstrate how great architecture is not simply for the elites or the wealthy The citizen preservationists and urbanists described in this book offer looser more playful and often more publicly satisfying alternatives to the development practices that have transformed iconic sites into expensive real estate or a clean slate for the next profitable endeavor Transcending the disciplinary boundaries of architecture historic preservation city planning and landscape architecture Postindustrial DIY suggests new ways to engage adapt and preserve architecturally compelling sites and bottom up strategies for Rust Belt revival

A Good Place to Do Business Roger Biles, Mark H. Rose, 2022-10-28 This book looks at the politics of downtown business promotion as an urban renewal strategy from the end of World War II to the present with a focus on five case cities Philadelphia Chicago Detroit St Louis and Cleveland

Edward Condon's Cooperative Vision Thomas C. Lassman, 2018-09-19 Born in 1902 Edward Condon made significant contributions to quantum theoretical physics Nearly ten years at Princeton University sealed his reputation as a leading figure in the field Then in 1937 he gave it all up to pursue an industrial career first at the Westinghouse Electric and Manufacturing Company and then by way of the federal government the National Bureau of Standards In a radical departure from professional norms Condon sought to redefine the relationship between academic science and technological innovation in industry He envisioned intimate cooperation with the universities to serve the needs of his employers and also the broader business community This book explores the birth life and death of that vision during the Great Depression World War II and the early Cold War Condon's cooperative model of R D evolved over time and by consequence laid bare sharp disagreements among academic corporate and government stakeholders about the practical value of new knowledge where and how it should be produced and ultimately on whose behalf it ought to be put to use
