Leading by Design Cassandra Erkins, Eric Twadell, 2012-01-31 By focusing on what students learn rather than what they are taught schools can redefine their mission and begin the transition to a professional learning community After interviewing and observing principals administrators and teachers the authors identify seven leadership practices that effective PLC leaders share along with the techniques that have led them to sustainable success

Five Levers to Improve Learning Tony Frontier, James Rickabaugh, 2014-01-08 Why have decades of school reform had so little measurable effect on student achievement Why have billions of dollars spent on technology small school initiatives and school choice options failed to improve our schools Too often educators are simply pulling the wrong levers say Tony Frontier and James Rickabaugh They explain that the various components of schooling fall into five categories structure sample standards strategy and self Understanding how these five levers work and their relative power can help unlock the potential for lasting improvements in teaching and learning The authors show readers that changes to structure and sample how schools are organized and how students are grouped will not be effective without changes to standards expectations for student learning strategy instructional strategies to engage students in meaningful learning and self the set of beliefs teachers and students have about their capacity to be effective At the heart of this book is a simple message for teachers administrators board members and education policymakers at all levels the key to success is not doing more work and making more changes but doing the right work and making the right changes

Demystifying Professional Learning Communities Kristine Kiefer Hipp, Jane Bumpers Huffman, 2010-02-16 The purpose of this book is to clearly define an approach to school improvement that uses professional learning community PLC practices to achieve school improvement and success for every student This book offers information examples and case studies to clarify the concept of a PLC to respond to critical issues in schools and to support educational leaders in addressing the important mandates of

accountability and school improvement As school leaders proactively lead efforts to create learning communities their schools districts and staff will incorporate knowledge skills and practices that focus on teaching and learning for all The authors findings will assist leaders change agents policy makers and university faculty in guiding schools toward creating and maintaining PLCs as they sustain school improvement for student learning

More Than a SMART Goal Anne E. Conzemius, Terry Morganti-Fisher, 2011-11-01 Setting data informed high priority SMART goals is a critical step in school improvement that is widely acknowledged However goals themselves don't drive improvement they must be aligned with the school improvement process curriculum instruction assessment practices mandates and professional development Understand how to properly use the SMART goal process to effect change and achieve real school improvement
