Pure Invention Matt Alt, 2021-06-22 The untold story of how Japan became a cultural superpower through the fantastic inventions that captured and transformed the world's imagination A masterful book driven by deep research new insights and powerful storytelling W David Marx author of Ametora How Japan Saved American Style Japan is the forge of the world's fantasies karaoke and the Walkman manga and anime Pac Man and Pok mon online imageboards and emojis But as Japan media veteran Matt Alt proves in this brilliant investigation these novelties did more than entertain They paved the way for our perplexing modern lives In the 1970s and 80s Japan seemed to exist in some near future gliding on the superior technology of Sony and Toyota Then a catastrophic 1990 stock market crash ushered in the lost decades of deep recession and social dysfunction The end of the boom should

have plunged Japan into irrelevance but that's precisely when its cultural clout soared when once again Japan got to the future a little ahead of the rest of us Hello Kitty the Nintendo Entertainment System and multimedia empires like Dragon Ball Z were more than marketing hits Artfully packaged dangerously cute and dizzyingly fun these products gave us new tools for coping with trying times They also transformed us as we consumed them connecting as well as isolating us in new ways opening vistas of imagination and pathways to revolution Through the stories of an indelible group of artists geniuses and oddballs *Pure Invention* reveals how Japan's pop media complex remade global culture *Schools and Screens* Victoria Cain, 2024-02-06 Why screens in schools from film screenings to instructional television to personal computers did not bring about the educational revolution promised by reformers Long before Chromebook giveaways and remote learning screen media technologies were enthusiastically promoted by American education reformers Again and again as schools deployed film screenings television programs and computer games screen based learning was touted as a cure for all educational ills But the transformation promised by advocates for screens in schools never happened In this book Victoria Cain chronicles important episodes in the history of educational technology as reformers technocrats public television producers and computer scientists tried to harness the power of screen based media to shape successive generations of students Cain describes how beginning in the 1930s champions of educational technology saw screens in schools as essential tools for training citizens and presented films to that end Among the films screened for educational purposes was the notoriously racist *Birth of a Nation* In the 1950s and 1960s both technocrats and leftist educators turned to screens to prepare young Americans for Cold War citizenship and from the 1970s through the 1990s as commercial television and personal computers arrived in classrooms screens in schools represented an increasingly privatized vision of schooling and civic engagement Cain argues that the story of screens in schools is not simply about efforts to develop the right technological tools rather it reflects ongoing tensions over citizenship racial politics private funding and distrust of teachers Ultimately she shows that the technologies that reformers had envisioned as improving education and training students in civic participation in fact deepened educational inequities *Full Range Leadership Development* John J. Sosik, Dongil Jung, 2011-02-25 It has been more than 20 years since Bernie Bass presented an integrated overview of full range leadership development This has been the standard for providing leadership training around the world in business military religious and educational contexts Penn State University's master of leadership development program is directed by John J Sosik and uses these transactional transformational leadership paradigms as their foundation for their courses This book can be used as a main textbook for this course and supplement any IO course in the area of leadership development Full range leadership development strives to grow transformational leadership in organizations at all levels including followers thereby generating numerous positive outcomes at all levels Organizations that support and develop transformational leadership across organizational levels are more productive and profitable attract and retain high quality associates promote creativity and innovation garner trust and

commitment from employees and are strategically positioned to respond well to changes in the market This book presents the different theories of leadership and concentrate on the process model of Full Range Leadership that explains the concepts and procedures by which leaders affect their followers individual leadership teams leader to team and organizations leader to larger systems This book can be used by practitioners or students as the authors provide practical action steps for how to best develop and display behaviors in the Full Range Leadership Development model Becoming Steve Jobs Brent Schlender,Rick Tetzeli,2015-03-24 The 1 New York Times bestselling biography of how Steve Jobs became the most visionary CEO in history Becoming Steve Jobs breaks down the conventional one dimensional view of Steve Jobs that he was half genius half jerk from youth an irascible and selfish leader who slighted friends and family alike Becoming Steve Jobs answers the central question about the life and career of the Apple cofounder and CEO How did a young man so reckless and arrogant that he was exiled from the company he founded become the most effective visionary business leader of our time ultimately transforming the daily life of billions of people Drawing on incredible and sometimes exclusive access Schlender and Tetzeli tell a different story of a real human being who wrestled with his failings and learned to maximize his strengths over time Their rich compelling narrative is filled with stories never told before from the people who knew Jobs best including his family former inner circle executives and top people at Apple Pixar and Disney most notably Tim Cook Jony Ive Eddy Cue Ed Catmull John Lasseter Robert Iger and many others In addition Schlender knew Jobs personally for 25 years and draws upon his many interviews with him on and off the record in writing the book He and Tetzeli humanize the man and explain rather than simply describe his behavior Along the way the book provides rich context about the technology revolution we ve all lived through and the ways in which Jobs changed our world A rich and revealing account Becoming Steve Jobs shows us how one of the most colorful and compelling figures of our times was able to combine his unchanging relentless passion with an evolution in management style to create one of the most valuable and beloved companies on the planet Making Silicon Valley Christophe Lécuyer,2006 A history of the innovative practices in the San Francisco area electronics industry that paved the way for the rise of the computer industry in Silicon Valley **Human-Computer Interaction** I.
