Developing DBASE IV Applications Tony Lima, 1989 *Partial Differential Equations and Boundary-Value Problems with Applications* Mark A. Pinsky, 2011 Building on the basic techniques of separation of variables and Fourier series the book presents the solution of boundary value problems for basic partial differential equations the heat equation wave equation and Laplace equation considered in various standard coordinate systems rectangular cylindrical and spherical Each of the equations is derived in the three dimensional context the solutions are organized according to the geometry of the coordinate system which makes the mathematics especially transparent Bessel and Legendre functions are studied and used whenever appropriate throughout the text The notions of steady state solution of closely related stationary solutions are developed for the heat equation applications to the study of heat flow in the earth are presented The problem of the vibrating string is studied in detail both in the Fourier transform setting and from the viewpoint of the explicit representation d Alembert formula Additional chapters include the numerical analysis of solutions and the method of Green s functions for solutions of partial differential equations The exposition also includes asymptotic methods Laplace transform and stationary phase With more than 200 working examples and 700 exercises more than 450 with answers the book is suitable for an undergraduate course in partial differential equations

Multilingualism and Intercultural Communication H. Ekkehard Wolff, Pamela Maseko, Russell H Kaschula, Christine Anthonissen, Bassey E Antia, 2017-05-01
An in depth look at the changing sociolinguistic dynamics that have influenced South African society To date there has been no published textbook which takes into account changing sociolinguistic dynamics that have influenced South African society Multilingualism and Intercultural Communication breaks new ground in this arena The scope of this book ranges from macro sociolinguistic questions pertaining to language policies and their implementation or non implementation to micro sociolinguistic observations of actual language use in verbal interaction mainly in multilingual contexts of Higher Education HE There is a gradual move for the study of language and culture to be taught in the context of professional disciplines in which they would be used for example Journalism and African languages Education and African languages etc The book caters for this growing market Because of its multilingual nature it caters to English and Afrikaans language speakers as well

as the Sotho and Nguni language groups _ the largest languages in South Africa and also increasingly used in the context of South African Higher Education It brings together various inter linked disciplines such as Sociolinguistics and Applied Language Studies Media Studies and Journalism History and Education Social and Natural Sciences Law Human Language Technology Music Intercultural Communication and Literary Studies The unique cross cutting disciplinary features of the book will make it a must have for twenty first century South African students and scholars and those interested in applied language issues
