The News, 2006 **Technology, Crime and Justice** Michael McGuire, 2012-06-14 As technology comes to characterize our world in ever more comprehensive ways there are increasing questions about how the rights and wrongs of technological use can be adequately categorized To date the scope of such questions have been limited focused upon specific technologies such as the internet or bio technology with little sense of any social or historical continuities in the way technology in general has been regulated In this book for the first time the question of technology and its relation to criminal justice is approached as a whole *Technology Crime and Justice* analyzes a range of technologies including information communications nuclear biological transport and weapons technologies amongst many others in order to pose three interrelated questions about their affects upon criminal justice and criminal opportunity to what extent can they really be said to provide new criminal opportunity or to enhance existing ones what are the key characteristics of the ways in which such technologies have been regulated how does technology itself serve as a regulatory force both in crime control and social control more widely *Technology Crime and Justice* considers the implications of contemporary technology for the practice of criminal justice and relates them to key historical precedents in the way technology has been interpreted and controlled It outlines a new social way of thinking about technology in terms of its affects upon our bodies and what they can do most obviously the ways in which social life and our ability to causally interact with the world is extended in various ways It poses the question could anything like a Technomia of technology be identified a recognizable set of principles and sanctions which govern the way that it is produced and used principles also consistent with our sense of justice This book provides a key resource for students and scholars of both criminology and technology studies **Living with Things** Nicky Gregson, 2007 *Living with Things* provides an account of consumption in terms of its centrality to our dwelling practices Its focus is on the home particularly on the movement of people and things within and through it in everyday habitation Here dwelling is seen as an activity as doing things with and to the things to hand around us Being at home is achieved through living amongst things as well as amongst people and other non human presences such as pets and gardens Being at home is achieved through what we do with objects the things that are acquired and stored that linger around in our homes sometimes for

decades and which we may eventually get rid of These ordinary things make dwelling structures accommodating accommodations they make them homes Based primarily on a former coal mining village in North east England this book explores practices of inhabitation from moving in or being modernised to the daily accommodation of sleep and children It provides a demonstration of what happens to consumption research when it comes home and is positioned not in sites of exchange but within the home and in households *Global Sources Electronics* ,2007 *Materials and the Environment* Michael F. Ashby,2020-12-21 *Materials and the Environment* Third Edition discusses the history of our increasing dependence on materials and energy The book explains where materials come from and how they are used in a variety of industries along with their lifecycle and relationship to energy and carbon In addition it covers the controls and economic instruments that hinder the use of engineering materials considers sustainability from a materials perspective and highlights the importance of low carbon power and material efficiency Further sections cover the mechanical thermal and electrical properties of engineering metals polymers ceramics composites and natural materials and their relationship to environmental issues This book is intended for instructors and students of Engineering Materials Science and Industrial Product Design as well as for materials engineers and product designers who need to consider the environmental implications of materials in their designs Introduces methods and tools for thinking about and designing with materials within the context of their role in products and the environmental consequences Contains numerous case studies showing how the methods discussed in the book can be applied to real world situations Includes full color datasheets for dozens of the most widely used materials featuring such environmentally relevant information as their annual production and reserves embodied energy and process energies carbon footprints and recycling data *Drum* ,1999 **Strategy** Brad MacKay,Mikko Arevuo,David Mackay,Maureen Meadows,2020 A new breed of strategy textbook for a new generation of strategists Strategy Theory Practice Implementation puts the implementation of strategy centre stage to help tomorrow s business professionals think talk and act like a strategist RAC Year Book ,2003
