major new project a two volume series of biographies of every female MP ever to be elected to the House of Commons When Constance Markievicz stood for election as MP for Dublin St Patrick's in 1918 few people believed she could win the seat yet she did A breakthrough in the bitter struggle for female enfranchisement had come earlier that year followed by a second landmark piece of legislation allowing women to be elected to Parliament and Markievicz duly became the first woman MP A member of Sinn Féin she refused to take her seat She did however pave the way for future generations and only eleven months later Nancy Astor entered the Commons A century on from that historic event 491 women have now passed through the hallowed doors of Parliament Each one of these pioneers has fought tenaciously to introduce enduring reform and in doing so has helped revolutionise Britain's political landscape ensuring that women's contributions are not consigned to the history books Containing profiles of all 287 woman MPs from 1997 to 2019 and with female contributors from Mary Beard to

MDEhlers Danlos Syndrome is another form of the human body Just as there are tall people short people dark skin colored people and light skin colored people each with their own set of medical issues similarly there are hypermobile people and not so hypermobile individuals who have different medical issues Our understanding of EDS has improved but we still have a lot of work to do While the medical world works on understanding Ehlers Danlos Syndrome people with EDS have provided us with stories of courage and ingenuity These stories give others and doctors the strength to find solutions PRADEEP CHOPRA MDAs a physical therapist who works with many patients suffering from EDS I've seen firsthand how isolating and frustrating EDS can be Along with a more knowledgeable medical field what these patients need most is an understanding that they are not alone and to be given hope Our Stories of Strength provides both community and hope and will be just as effective as any medication or exercise CHRISTOPHER GNIP PT DPTEDS is a group of heritable connective tissue disorders that can cause a wide variety of symptoms throughout different body systems each unique in presentation to the individual The variety of symptoms and presentations proves challenging to the medical community in diagnosing and treating patients many of whom are misdiagnosed and suffer as a result EDS has been commonly viewed as just Benign Joint Hypermobility Syndrome BJHS JHS or Hypermobility Syndrome HMS Based on recent research the prevalence of EDS exceeds current estimates Kendra Neilsen Myles founded Sisters Media LLC with core values of giving back and providing an outlet to those willing to share their stories through submissions in the Our Stories of Strength tm anthology series Sisters Media recognizes that it is through opening doors to needed conversations and sharing stories of strength determination and perseverance that we can facilitate positive changes in the way we live and help shape perceptions of those around us as well as in the medical community We are Stronger2Gether
