And Climate Change Second Observed Impacts:

Encyclopedia of Global Warming and Climate Change, Second Edition S. George Philander, 2012-06-13 The First Edition of the Encyclopedia of Global Warming and Climate Change provided a multi authored academic yet non technical resource for students and teachers to understand the importance of global warming to appreciate the effects of human activity and greenhouse gases around the world and to learn the history of climate change and the research enterprise examining it This edition was well received with notable reviews Since its publication the debate over the advent of global warming at least partially brought on by human enterprise has continued to ebb and flow depending literally on the weather politics and media coverage of climate summits and debates Advances in research also change the discourse as new data is collected and new scientific projects continue to explore and explain global warming and climate change Thus a new Second Edition updates more than half of the original entries and adds new perspectives and content to keep students and researchers up to date in a field that has proven provocatively lively

A user guide to the CCAFS Gender and Climate Change Survey data Bryan, Elizabeth, Bernier, Quinn, Ringler, Claudia, 2018-07-03 The CCAFS Gender and Climate Survey data were collected in 4 sites in Africa South of the Sahara in early 2013 as part of the CGIAR Research Program on Climate Change Agriculture and Food Security CCAFS under the project on Increasing Women s Resilience to Confront Climate Change 2 The survey grew out of collaboration organized by CCAFS between researchers participating in the program from the International Food Policy Research Institute IFPRI and the International Livestock Research Institute ILRI The project aimed to enhance understanding of gendered climate change perceptions impacts coping and adaptation strategies and the constraints to adaptation within selected CCAFS baseline sites in Kenya Senegal and Uganda These issues are areas where CCAFS interventions may lead to gender transformative outcomes Specifically the survey was designed to answer the following questions How do men and women perceive climate change and particularly the livelihood risks associated with climate change What are the gender disparities in access to and control over assets and how and to what degree does the disparity in assets affect how men and women experience climate shocks and change How and to what degree does asset disparity determine how men and women respond to climate shocks and change Which coping strategies and adaptation options are favored by women and men respectively and why The survey collected detailed gender disaggregated data on these issues to inform strategies to increase climate change resilience among both women and men farmers Multiple members of each household were surveyed to capture gendered views and experiences The data therefore offer valuable insights into the ways in which men and women perceive and adopt innovations differently
