<https://lilinmanissatu.blogspot.com/?read=1620408554> | Read ebook [PDF] The Conversation: A Revolutionary Plan for End-of-Life Care | In this "enlightening" (Jane Brody, New York Times) book, Harvard Medical School physician Angelo E. Volandes offers a solution to traumatic end-of-life care: talking, medicine's oldest tool. There is an unspoken dark side of American medicine--keeping patients alive at any price. Two thirds of Americans die in healthcare institutions, tethered to machines and tubes at bankrupting costs, even though research shows that most prefer to die at home in comfort, surrounded by loved ones. Dr. Angelo E. Volandes believes that a life well lived deserves a good ending. Through the stories of seven patients and seven very different end-of-life experiences, he demonstrates that what people with a serious illness, who are approaching the end of their lives, need most is not new technologies but one simple thing: The Conversation. He argues for a radical re-envisioning of the patient-doctor relationship and offers ways for patients and their families to talk about this difficult issue to ensure that patients will be at the center and in charge of their medical care. It might be the most important conversation you ever have.

The Medicalization of Birth and Death Lauren K. Hall, 2019-12-17 Improving how individuals give birth and die in the United States requires reforming the regulatory reimbursement and legal structures that centralize care in hospitals and prevent the growth of community based alternatives In 1900 most Americans gave birth and died at home with minimal medical intervention By contrast most Americans today begin and end their lives in hospitals The medicalization we now see is due in large part to federal and state policies that draw patients away from community based providers such as birth centers and hospice care and toward the most intensive and costliest kinds of care But the evidence suggests that birthing and dying people receive too much even harmful medical intervention In The Medicalization of Birth and Death political scientist Lauren K Hall describes how and why birth and death became medicalized events While hospitalization provides certain benefits she acknowledges it also creates harms limiting patient autonomy driving up costs and causing a cascade of interventions many with serious side effects Tracing the regulatory legal and financial policies that centralize care during birth and death Hall argues that medicalization reduces competition stifles innovation and prevents individuals from accessing the most appropriate care during their most vulnerable moments She also examines the profound implications of policy enforced medicalization on informed consent and shows how medicalization challenges the healthcare community s most foundational ethical commitments Drawing on interviews with medical and nonmedical healthcare providers as well as surveys of patients and their families Hall provides a broad overview of the costs benefits and origins of medicalized birth and death The Medicalization of Birth and Death is required reading for academics patients providers

policymakers and anyone else interested in how policy shapes healthcare options and limits patients and providers during life's most profound moments **Through the Valley of Shadows** Samuel Morris Brown, 2016-04-01 In place of living wills which have fundamentally misunderstood the problems people face during life threatening illness researcher and practicing ICU physician Samuel Morris Brown advocates a system of individualized guidance alongside fundamental reform In this provocative and empathetic book rich in patients stories Brown offers a blueprint for a truly humane ICU **After**
