And Energy Informatics Ch Conference Proceedings:

Proceedings of the 4th International Conference on Electronic Engineering and Renewable Energy Systems—Volume 1
Bekkay Hajji, Antonio Gagliano, Adel Mellit, Abdelhamid Rabhi, Michele Calì, 2025-03-19 This book includes papers presented at the 4th International Conference on Electronic Engineering and Renewable Energy ICEERE 2024 held in Saidia Morocco which focus on the application of artificial intelligence techniques emerging technology and the Internet of things in electrical and renewable energy systems including hybrid systems micro grids networking smart health applications smart grid mechatronics and electric vehicles It particularly focuses on new renewable energy technologies for agricultural and rural areas to promote the development of the Euro Mediterranean region Given its scope the book is of interest to graduate students researchers and practicing engineers working in the fields of electronic engineering and renewable energy The book represents Volume 1 for this conference proceedings which consist of a 2 volume book series Scientific Computing and Algorithms in Industrial Simulations Michael Griebel, Anton Schüller, Marc Alexander Schweitzer, 2017-10-30 The contributions gathered here provide an overview of current research projects and selected software products of the Fraunhofer Institute for Algorithms and Scientific Computing SCAI They show the wide range of challenges that scientific computing currently faces the solutions it offers and its important role in developing applications for industry Given the exciting field of applied collaborative research and development it discusses the book will appeal to scientists practitioners and students alike The Fraunhofer Institute for Algorithms and Scientific Computing SCAI combines excellent research and application oriented development to provide added value for our partners SCAI develops numerical techniques parallel algorithms and specialized software tools to support and optimize industrial simulations Moreover it implements custom software solutions for production and logistics and offers calculations on high performance computers Its services and products are based on state of the art methods from applied mathematics and information technology *Cryptocoding Based on Quasigroups* Daniela Mechkaroska, Aleksandra Popovska-Mitrovikj, Verica Bakeva, 2024-01-12 This book presents the concept of cryptocoding which arises from the need to obtain secure and accurate transmission Therefore it is necessary to improve constantly existing and develop new algorithms that will ensure accurate and secure data transfer This leads to the intensive development of coding theory and cryptography as scientific fields which solve these problems To ensure efficient and secure data transmission at the same time the concept of cryptocoding is developed such that the coding and encryption processes are merged into one process Cryptocodes provide correction of a certain number of errors in the transmitted message and data confidentiality using only one algorithm The main research in this field is to define new algorithms for coding that detects and corrects errors random codes stream ciphers block ciphers pseudo random generators hash functions etc This monograph examines an application of quasigroups for designing error correcting cryptocodes called Random Codes Based on Quasigroups RCBQ These codes are a combination of cryptographic algorithms and error correcting

codes and depend on several parameters Some modifications new coding decoding algorithms of RCBQ for improving their performances for transmission ordinary messages images and audio files through a binary symmetric channel Gaussian channel and burst channels are considered Also authors propose and analyze filter for visually enhance of the decoded images and improving the quality of decoded audio files

Sensors and Instrumentation, Aircraft/Aerospace, Energy Harvesting & Dynamic Environments Testing, Volume 7 Chad Walber, Patrick Walter, Steve Seidlitz, 2025-08-07 Sensors and Instrumentation Aircraft Aerospace and Energy Harvesting Volume 7 Proceedings of the 38th IMAC A Conference and Exposition on Structural Dynamics 2020 the seventh volume of eight from the Conference brings together contributions to this important area of research and engineering The collection presents early findings and case studies on fundamental and applied aspects of Shock Vibration Aircraft Aerospace Energy Harvesting Dynamic Environments Testing including papers on Alternative Sensing Acquisition Active Controls Instrumentation Aircraft Aerospace Aerospace Testing Techniques Energy Harvesting

Solar Energy Conversion And Photoenergy System - Volume I Julian Blanco, Sixto Malato, 2009-10-29 Solar Energy Conversion and Photoenergy Systems theme in two volumes is a component of Encyclopedia of Energy Sciences Engineering and Technology Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty Encyclopedias Any human activity needs energy and renewable energies are always present all over the world Each location has its own specific renewable potential and it is our task to develop the suitable technologies to profit at local level this potential to not only produce the needed energy but also create economic activity and wealth Solar energy in particular has the highest potential among all existing renewable energies and in the context of the energy water and climate change global problems mankind will face in the coming years the substantial integration of solar energy technologies into our societies will an absolute needs in the short to medium term The number of applications of solar energy is simply huge covering a very wide range of human activities Some of these applications are already technically and economically viable being others still at research or demonstration level In addition it has been demonstrated the important benefits solar energy can provide to any area with medium high solar irradiation level from sustainability to energy independence as well as economic development and knowledge creation Due to this solar energy development from photovoltaic to solar thermal or power applications has been very intense during the last years in all the so called Sun Belt There is also the general consensus at many countries that we should accelerate the current solar energy pathway increasing the research efforts to make economically feasible the applications that today are only technically feasible This effort and the status of most of these applications have been discussed along this paper and within the articles of the topic The Theme on Solar Energy Conversion and Photoenergy Systems with contributions from distinguished experts in the field discusses solar energy related technologies and applications some of which are already in commercial and practical applications and others are under research and testing level The volumes provide an analysis and discussion about the reasons behind the current

efforts of our society considering both developed and developing countries to accelerate the introduction of the huge solar energy potential into our normal daily lives The two volumes also provide some basic information about the solar energy potential history and the amazing trip of a photon from its creation in the Sun until its arrival to the Earth These two volumes are aimed at the following five major target audiences University and College Students Educators Professional Practitioners Research Personnel and Policy Analysts Managers and Decision Makers NGOs and GOs **Research Handbook on**

Information Systems and the Environment Vanessa A. Cooper, Johann J. Kranz, Saji K. Mathew, Richard T.

Watson, 2023-07-01 This comprehensive Research Handbook provides international perspectives on the role of information systems in environmental sustainability drawing on ground breaking research from leading scholars to predict future trends Presenting in depth studies which utilise a diverse range of research approaches and methods this insightful Handbook provides a thorough examination of information systems research on environmental sustainability **SOLAR ENERGY CONVERSION AND PHOTOENERGY SYSTEMS: Thermal Systems and Desalination Plants-Volume I** Julian Blanco Gálvez, Sixto Malato Rodríguez, E. Delyannis, Vassilis G. Belessiotis, S. C. Bhattacharya and S. Kumar, 2010-11-20 Solar Energy Conversion and Photoenergy Systems Thermal Systems and Desalination Plants theme in five volumes is a component of Encyclopedia of Energy Sciences Engineering and Technology Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias The Theme on Solar Energy Conversion and Photoenergy Systems Thermal Systems and Desalination Plants with contributions from distinguished experts in the field discusses solar energy renewable energy thermal systems and desalination systems some of which are already in commercial and practical applications and others are under research and testing level The volumes provide an analysis and discussion about the reasons behind the current efforts of our society considering both developed and developing countries to accelerate the exploitation of the huge solar energy potential in our normal daily lives The five volumes also provide some basic information about the solar energy potential history and the amazing trip of a photon from its creation in the Sun until its arrival to the Earth These five volumes are aimed at the following five major target audiences University and College Students Educators Professional Practitioners Research Personnel and Policy Analysts Managers and Decision Makers NGOs and GOs Spectrum Sharing in Wireless Networks John D. Matyjas, Sunil Kumar, Fei Hu, 2016-11-17 Spectrum Sharing in Wireless Networks Fairness Efficiency and Security provides a broad overview of wireless network spectrum sharing in seven distinct sections The first section examines the big picture and basic principles explaining the concepts of spectrum sharing hardware software function requirements for efficient sharing and future trends of sharing strategies The second section contains more than 10 chapters that discuss differing approaches to efficient spectrum sharing The authors introduce a new coexistence and sharing scheme for multi hop networks describe the space time sharing concept introduce LTE U and examine sharing in broadcast and unicast environments They then talk about different cooperation strategies to achieve

mutual benefits for primary users PU and secondary users SU discuss protocols in a spectrum sharing context and provide different game theory models between PUs and SUs The third section explains how to model the interactions of PUs and SUs using an efficient calculation method to determine spectrum availability Additionally this section explains how to use scheduling models to achieve efficient SU traffic delivery The subject of the fourth section is MIMO oriented design It focuses on how directional antennas and MIMO antennas greatly enhance wireless network performance The authors include a few chapters on capacity rate calculations as well as beamforming issues under MIMO antennas Power control is covered in the fifth section which also describes the interference aware power allocation schemes among cognitive radio users and the power control schemes in cognitive radios The sixth section provides a comprehensive look at security issues including different types of spectrum sharing attacks and threats as well as corresponding countermeasure schemes The seventh and final section covers issues pertaining to military applications and examines how the military task protects its data flows when sharing the spectrum with civilian applications
