Johan Fischer

And Islam Standards Technoscience Routledge Anthropology:

Islam, Standards, and Technoscience Johan Fischer, 2015-10-23 Halal literally permissible or lawful production trade and standards have become essential to state regulated Islam and to companies in contemporary Malaysia and Singapore giving these two countries a special position in the rapidly expanding global market for halal products in these nations state bodies certify halal products as well as spaces shops factories and restaurants and work processes and so consumers can find state halal certified products from Malaysia and Singapore in shops around the world Building on ethnographic material from Malaysia Singapore and Europe this book provides an exploration of the role of halal production trade and standards Fischer explains how the global markets for halal comprise divergent zones in which Islam markets regulatory institutions and technoscience interact and diverge Focusing on the bigger institutional picture that frames everyday halal consumption Fischer provides a multisited ethnography of the overlapping technologies and techniques of production trade and standards that together warrant a product as halal and thereby help to format the market Exploring global halal in networks training laboratories activism companies shops and restaurants this book will be an essential resource to scholars and students of social science interested in the global interface zones between religion standards and technoscience The Routledge Companion to Anthropology and Business Raza Mir, Anne-Laure Fayard, 2020-06-11 Interest in anthropology and ethnography has been an ongoing feature of organizational research and pedagogy this book provides a key reference text that pulls together the different ways in which anthropology infuses the study of organizations both epistemologically and methodologically The volume hosts key scholars and experts within the fields of Organizational Anthropology Organizational Ethnography Organizational Studies and Qualitative Research The book provides a combination of methodological guidelines exemplars and epistemological reflection It includes methodological viewpoints ethnographic journeys within organizations as well as beyond organizations and individual reflections on challenges faced by organizational ethnographers This book is aimed at PhD master and advanced undergraduate students and researchers across disciplines especially those who are engaged with general management organizational behaviour strategy and anthropological ethnographic issues *The Oxford Handbook of Law and Anthropology* Marie-Claire Foblets, Mark Goodale, Maria Sapi gnoli, Olaf Zenker, 2022-04-01 The Oxford Handbook of Law and Anthropology is a ground breaking collection of essays that provides an original and internationally framed conception of the historical theoretical and ethnographic interconnections of law and anthropology Each of the chapters in the Handbook provides a survey of the current state of scholarly debate and an argument about the future direction of research in this dynamic and interdisciplinary field The structure of the Handbook is animated by an overarching collective narrative about how law and anthropology have and should relate to each other as intersecting domains of inquiry that address such fundamental questions as dispute resolution normative ordering social organization and legal political and social identity The need for such a comprehensive project has become even more pressing as lawyers and

anthropologists work together in an ever increasing number of areas including immigration and asylum processes international justice forums cultural heritage certification and monitoring and the writing of new national constitutions among many others The Handbook takes critical stock of these various points of intersection in order to identify and conceptualize the most promising areas of innovation and sociolegal relevance as well as to acknowledge the points of tension open questions and areas for future development **Anthropology and Alterity** Bernhard Leistle,2016-12-08

Alterity or otherness is a central notion in cultural anthropology and philosophy as well as in other disciplines While anthropology with its aim of understanding cultural difference tends to take otherness as a fact there have been vigorous attempts in contemporary philosophy particularly in phenomenology to answer the fundamental question What is the Other This book brings the two approaches to otherness the hermeneutical pragmatics of anthropology and the radical reflection of philosophy together with the goal of enriching one through the other The philosophy of the German phenomenologist Bernhard Waldenfels up to now little known to anthropologists has a central position in this undertaking Waldenfels s concept of a responsivity to the Other offers to cultural anthropology the possibility of a philosophical engagement with the Other that does not contradict the project of making sense of concrete empirical others The book illustrates the fertility of this new approach to alterity through a broad spectrum of themes ranging from reflections on theory formation via discussions of race and human animal relations to personal meditations on experiences of alterity *Routledge Handbook of Islam in the West* Roberto Tottoli,2022-02-21 With new topics and contributions this updated second edition discusses the history and contemporary presence of Islam in Europe and America The book debates the relevance and multi faceted participation of Muslims in the dynamics of Western societies challenging the changing perception on both sides Collating over 30 chapters written by experts from around the world the volume presents a wide range of perspectives Case studies from the Muslim presence in the Iberian Peninsula between the Middle Ages and the modern age set off the Handbook along with an outline of Muslims in America up to the twentieth century The second part covers concepts around new conditions in terms of consolidating identities the emergence of new Muslim actors the appearance of institutions and institutional attitudes the effects of Islamic presence on the arts and landscapes of the West and the relational dynamics like ethics and gender Exploring the influence of Islam particularly its impact on society culture and politics this interdisciplinary volume is a key resource for policymakers academics and students interested in the history of Islam religion and the contemporary relationship between Islam and the West Meeting Ethnography Jen Sandler,Renita Thedvall,2017-03-27 This volume asks and addresses elusive ontological epistemological and methodological questions about meetings What are meetings What sort of knowledge identities and power relationships are produced performed communicated and legitimized through meetings How do and how might ethnographers study meetings as objects and how might they best conduct research in meetings as particular elements of their field sites Through contributions from an international group of ethnographers who

have conducted meeting ethnography in diverse field sites this volume offers both theoretical insight and methodological guidance into the study of this most ubiquitous ritual Muslim Piety as Economy Johan Fischer, Jérémy Jammes, 2019-10-11 The first volume to explore Muslim piety as a form of economy this book examines specific forms of production trade regulation consumption entrepreneurship and science that condition and are themselves conditioned by Islamic values logics and politics With a focus on Southeast Asia as a site of significant and diverse integration of Islam and the economy as well as the incompatibilities that can occur between the two it reveals the production of a Muslim piety as an economy in its own right Interdisciplinary in nature and based on in depth empirical studies the book considers issues such as the Qur'anic prohibition of corruption and anti corruption reforms the emergence of the Islamic economy under colonialism halal or lawful production trade regulation and consumption modesty in Islamic fashion marketing communications and financialisation consumerism and housing As such it will appeal to scholars of sociology anthropology and religious studies with interests in Islam and Southeast Asia Fieldwork and the Self Jérémy Jammes, Victor T. King, 2021-11-09 This book presents new perspectives on Southeast Asia using cases from a range of ethnic groups cultures and histories written by scholars from different ethnicities generations disciplines and scientific traditions It examines various research trajectories engaging with epistemological debates on the global and local on insiders and outsiders and the role played by personal experiences in the collection and analysis of empirical data The volume provides subjects for debate rarely addressed in formal approaches to data gathering and analysis Rather than grappling with the usual methodological building blocks of research training it focuses on neglected issues in the research experience including chance error coincidence mishap dead ends silence secrets improvisation remembering digital challenges and shifting tracks Fieldwork and the Self is relevant to academics and researchers from universities and international organisations who are engaged in teaching and learning in area studies and social science research methods A rich and compelling set of writings about fieldwork in and beyond Southeast Asia Lyn Parker Emeritus Professor University of Western Australia A must read for all especially emerging scholars on Southeast Asia and a refreshing read for critical old hands on the region Abdul Rahman Embong Emeritus Professor Institute of Malaysian and International Studies IKMAS Universiti Kebangsaan Malaysia An impressive collection of essays by two academics who have devoted their academic life to anthropological fieldwork in Southeast Asia Shamsul A B Distinguished Professor and UNESCO Chair Universiti Kebangsaan Malaysia The contributors share an unquenchable and passionate curiosity for Southeast Asia They have survived the uncertainties and disillusionment of their fieldwork and remained first grade scholars Marie Sybille de Vienne Professor National Institute for Oriental Languages and Civilisations Paris A penetrating reflection on current social science research on Southeast Asia Hans Dieter Evers Professor Emeritus and Senior Fellow University of Bonn Vegetarianism, Meat and Modernity in India Johan Fischer, 2023-04-07 Never before in human history have vegetarianism and a plant based economy been so closely associated with sustainability and the promise of tackling climate

change Nowhere is this phenomenon more visible than in India which is home to the largest number of vegetarians globally and where vegetarianism is intrinsic to Hinduism India is often considered a global model for vegetarianism However in this book which is the outcome of eight months of fieldwork conducted among vegetarian and non vegetarian producers traders regulators and consumers I show that the reality in India is quite different with large sections of communities being meat eaters In 2011 vegetarian veg green and nonvegetarian non veg brown labels on all packaged foods drinks were introduced in India Paradoxically this grand scheme was implemented at a time when meat and non vegetarian food production trade and consumption were booming The overarching argument of the book is that a systematic study of the complex and changing relationship between vegetarian and non vegetarian understandings and practices illuminates broader transformations and challenges that relate to markets the state religion politics and identities in India and beyond The book s empirical focus is on the changing relationship between vegetarian non vegetarian as understood practised and contested in middle class India while remaining attentive to the vegetarian non vegetarian modernities that are at the forefront of global sustainability debates Through the application of this approach the book provides a novel theory of human values and markets in a global middle class perspective

Food Values in Europe Valeria Siniscalchi, Krista Harper, 2019-09-05 What can a focus on food projects in Europe tell us about contemporary social processes and cultural debates Valeria Siniscalchi and Krista Harper show how food becomes a marker of identity and resistance to social exclusion and how food values become tools for transforming power dynamics at the local level and beyond Through the comparison of food centered movements across Europe the book explains how these forms of mobilization express ideologies as well as economic and political objectives The chapters use an ethnographic approach to focus on the transformation of values carried by individuals and groups in relation to food in Portugal Greece Latvia Moldova Denmark the UK Italy and France Contributors analyze food values as expressed in daily life and livelihoods through specific practices of production exchange and consumption Topics covered include Prague s urban agricultural scene the perception of poverty in Moldova shepherds protests in Sardinia and organic food cooperatives in Catalonia

This is likewise one of the factors by obtaining the soft documents of this **And Islam Standards Technoscience Routledge Anthropology** by online. You might not require more epoch to spend to go to the ebook start as capably as search for them. In some cases, you likewise get not discover the broadcast And Islam Standards Technoscience Routledge Anthropology that you are looking for. It will agreed squander the time.

However below, later than you visit this web page, it will be for that reason categorically easy to get as with ease as download lead And Islam Standards Technoscience Routledge Anthropology

It will not agree to many mature as we run by before. You can reach it even if affect something else at house and even in your workplace. hence easy! So, are you question? Just exercise just what we meet the expense of under as capably as review **And Islam Standards Technoscience Routledge Anthropology** what you once to read!
