categories trust and attachment authority and autonomy and cooperation and competitiveness In this new edition Michael Jacobs gives psychodynamic counselling and therapy a truly human face He brings practice to the forefront in a new three part structure This is realized through the swift introduction of the themes in the therapeutic relationship throughout the book making integration of theory and practice clearer than ever Looking at what the client presents as troubling them what the therapist experiences about the client and their relationship in therapy and exploring theories to throw light on these themes now lies firmly at the core of the book Fully updated with new references The Presenting Past stays wonderfully readable The book shows Jacobs at his best and is a testimony to his lifetime of experience **Cumulated Index Medicus**
