And Soundings History Hope Selected Essays:

Rhyiming Hope and History Russell Rook, 2011-10-26 The subject of culture has provided theologians with a whole new realm of exploration By the turn of the twentieth century and the beginning of this new millennium the subject of culture had presented itself to theologians and church leaders for vital consideration As one of the world s leading theologians Robert Jenson s eminent career has coincided with the pre eminence of culture in theological and churchly discussion Having described himself as a theologian of culture in his earliest works culture continually informs Jenson s systematic theology which in turn works its way out in countless cultural forms In Rhyiming Hope and History we explore the philosophical and theological influences of Jenson s work and outline their vast and varied applications to the world of culture and the life of the church For Jenson the church is the cultural embodiment of the risen Christ in the fallen reality of our world In a series of conversations between Jenson and leading thinkers including G W F Hegel Jonathan Edwards Wittgenstein Richard H Niebuhr Kathryn Tanner Paul Tillich Nicholas Wolterstorff Augustine and Jeremy Begbie we explore this creative and courageous proposal Select Essays, Doctrinal & Practical, on a Variety of the Most Important and Interesting Subjects in Divinity William McEwen, 1814 **Sounding the Virtual: Gilles Deleuze and the Theory and Philosophy of Music** Nick Nesbitt, 2016-04-01 It is the contention of the editors and contributors of this volume that the work carried out by Gilles Deleuze where rigorously applied has the potential to cut through much of the intellectual sedimentation that has settled in the fields of music studies Deleuze is a vigorous critic of the Western intellectual tradition calling for a philosophy of difference and despite its ambitions he is convinced that Western philosophy fails to truly grasp or think difference as such It is argued that longstanding methods of conceptualizing music are vulnerable to Deleuze s critique But as Deleuze himself stresses more important than merely critiquing established paradigms is developing ways to overcome them and by using Deleuze s own concepts this collection aims to explore that possibility Sounding Values Scott Burnham, 2017-05-15 For several decades Scott Burnham has sought to bring a ready ear and plenty of humanistic warmth to musicological inquiry Sounding Values features eighteen of his essays on mainstream Western music music theory aesthetics and criticism In these writings Burnham listens for the values aesthetic ethical intellectual of those who have created influential discourse about music while also listening for the values of the music for which that discourse has been generated The first half of the volume confronts pressing issues of historical theory and aesthetics including intellectual models of tonal theory leading concepts of sonata form translations of music into poetic meaning and recent rifts and rapprochements between criticism and analysis The essays in the second half can be read as a series of critical appreciations engaging some of the most consequential reception tropes of the past two centuries Haydn and humor Mozart and beauty Beethoven and the sublime Schubert and memory **Sourcebook for Research in Music, Third Edition** Allen Scott, 2015-06-01 Since it was first published in 1993 the Sourcebook for Research in Music has become an invaluable resource in musical scholarship The balance between

depth of content and brevity of format makes it ideal for use as a textbook for students a reference work for faculty and professional musicians and as an aid for librarians The introductory chapter includes a comprehensive list of bibliographical terms with definitions bibliographic terms in German French and Italian and the plan of the Library of Congress and the Dewey Decimal music classification systems Integrating helpful commentary to instruct the reader on the scope and usefulness of specific items this updated and expanded edition accounts for the rapid growth in new editions of standard works in fields such as ethnomusicology performance practice women in music popular music education business and music technology These enhancements to its already extensive bibliographies ensures that the Sourcebook will continue to be an indispensable reference for years to come

The Architectonics of Hope Kyle Gingerich Hiebert,2017-09-19 The Architectonics of Hope provides a critical excavation and reconstruction of the Schmittian seductions that continue to bedevil contemporary political theology Despite a veritable explosion of interest in the work of Carl Schmitt which increasingly recognizes his contemporary relevance and prescience there nevertheless remains a curious and troubling reticence within the discipline of theology to substantively engage the German jurist and sometime Nazi apologist By offering a genealogical reconstruction of the manner and extent to which recognizably Schmittian gestures are unwittingly repeated in subsequent debates that often only implicitly assume they have escaped the violent aporetics that characterize Schmitt s thought this volume illuminates hidden resonances between ostensibly opposed political theologies Using the complex relationship between violence and apocalyptic as a guide the genealogy traces the transformation of political theology through the work of a surprising collection of figures including Johann Baptist Metz John Milbank David Bentley Hart and John Howard Yoder

The Human Tradition in Latin America William H. Beezley,Judith Ewell,1987 This unique collection emphasizes the human element in the study of Latin American history by focusing on the lives of twenty three men women and children Though they differ widely from each other in background and circumstance these individuals share a common experience all are caught up in some way by the profound sometimes devastating changes that accompany the modernization of a traditional society Their stories bring vividly to life the impact that revolution economic upheaval urbanization destruction of community life and the disruption of family and gender roles have on ordinary people These studies also bring out the various ways often creative and courageous in which Latin Americans have coped with the fortunes and vicissitudes of progress

Christopher Dawson Joseph T. Stuart,2022-01-14 The English historian Christopher Dawson 1889 1970 was the first Catholic Studies professor at Harvard University and has been described as one of the foremost Catholic thinkers of modern times Joseph T Stuart argues that through Dawson s study of world cultures he acquired a cultural mind by which he attempted to integrate knowledge according to four implicit rules intellectual architecture boundary thinking intellectual asceticism and intellectual bridges Dawson responded to the cultural

fragmentation after the Great War 1914 1918 through this multilayered approach to culture which was an instantiation of John Henry Newman's philosophical habit of mind Stuart demonstrates how Dawson formed his cultural mind practicing an interdisciplinary science of culture involving anthropology sociology history and comparative religion and applied his cultural thinking to problems in politics and education
