Priest and Parish in Vienna William David Bowman, 1999 Priest and Parish in Vienna 1780 to 1880 details the social cultural and political transformation of the Austrian Catholic priesthood in nineteenth century Vienna It shows how priests a very important and influential group in Austria were changed from servants of the state into political activists working for the contentious Christian Social Party in fin de siècle Vienna

Taxation and Debt in the Early Modern City Michael Limberger, José Ignacio Andrés Ucendo, 2015-10-06 Fiscal relations between states and cities in early modern Europe is a major concern for economic and financial historians This collection of eleven essays is based on new research using documentary evidence from local and national archives from across Europe

The City & the Crown John Philip Spielman, 1993 Spielman presents the role of the Habsburg court in the rise of Vienna the early modern period His study clearly shows the extraordinarily complex web of interrelationships and interdependencies between the court its servants and the city as each strove to protect its privileges The author s innovative approach consists in identifying the specific role that the court quartering system played in the expansion of the government s involvement in the development of the city in so doing Spielman ties in the two approaches traditionally used in histories of early modern Germany and Austria the growth of the modern bureaucracy and the development of the Baroque

The History of Human Populations P. M. G. Harris, 2001-07-30 From classic demographic theory to the best contemporary thinking this book will fruitfully replace previous ways of looking at population expansion and contraction The 50 years of scholarship that covers 2 1 2 millennia peoples in all parts of the world and aggregates from hamlets to the global level this volume shows that populations grow or decline according to six related patterns Looking at the path taken by unrestricted population growth the effects of limited resources demographic disaster population explosion and the implications of stable population theory and demographic transition for numerical trends Harris reinterprets and insightfully interconnects all of these via six related growth curves opening the way for a better understanding of how populations expand through changes in births deaths and migrations and how they interact with their economic social and physical environments All six trend types the book shows are shaped by forces internal to the dynamics of populations themselves Most frequently they increase in a constantly proportionally slowing curve as a specific stimulus is spent through expansion With shocks like war or epidemics they contract according to

an upside down version of this curve The only two curves until recent times these are still the most common in local populations With modern economic and social change some populations mostly larger ones follow one of four newer growth patterns either increasing at a steady rate growing in a gradually slowing pattern between this constancy and the rapidly decelerating basic growth curve exploding in an accelerating fashion or in a few ominous cases decreasing in an accelerating decline Where these curves occur depends on the distinctive ways populations interact with economic changes Harris's findings have profound implications for understanding economic and social change These implications will be discussed in the following volume

Life Course, Work, and Labour in Global History Josef Ehmer, Carola Lentz, 2023-09-18 This multidisciplinary volume offers unique perspectives across the globe and throughout the centuries on the complexity of the nexus between work and the life course For industrialized regions from Germany and Western Europe to China and Japan it questions the widespread notion of an overall growing working life course instability since the 1970s For unindustrialized or industrializing regions from West Africa to state socialist East Central Europe as well as for transnational and transcontinental labour migrations it shows the enormous influence of the extended family and wider kin on individual pathways into and out of work For early modern Europe India and China and up to twentieth century state socialism and to current welfare states it stresses and concretizes the crucial impact of age and gender for both societal labour relations and individual work related decision making With all chapters based on original research the volume reflects a close cooperation between historians anthropologists and sociologists Its multidisciplinary approach finds expression in its methodological plurality reaching from archival research and sophisticated statistical analyses to biographical interviews and participant observation This mix allows to grasp the interaction between societal change and individual agency

War, Religion and Court Patronage in Habsburg Austria K. MacHardy, 2016-02-02 This case study of the causes of the Thirty Years War suggests an alternative framework to that of Absolutism and views statebuilding as an interactive bargaining process that can engender challenges to political authority It shows how selective court patronage changed the cultural habits of nobles in education manners and tastes but failed to transform religious identities which were intimately tied to noble interests Instead the confessionalization of patronage deepened divisions within the elite providing multiple incentives for the formation of an anti Habsburg alliance among Protestants in 1620
