Agrobiodiversity Conservation And Economic Development Routledge Explorations In Environmental Economics:

Agrobiodiversity Conservation and Economic Development Andreas Kontoleon, Unai Pascual, Melinda Smale, 2008-10-03

This book reflects current developments in the economics of agrobiodiversity and focuses its attention on the role agrobiodiversity can have for economic development As a new and rapidly expanding subfield at the interface of environmental ecological agricultural and development economics the editors and contributors to this volume provide a thorough structured and authoritative coverage of this field Topics covered include the economic modelling of agrobiodiversity policy and governance solutions for the conservation of biodiversity in agricultural landscapes contracts markets and valuation The authors include well known and respected academics and researchers who have a real policy perspective into the role of agrobiodiversity and economic development The book provides coherent and up to date coverage of the economics of in situ agrobiodiversity conservation which is to a large extent currently absent Though the material in the volume is primarily written for economists its content and style are highly relevant and accessible to ecologists and conservation biologists and to academics from other broad disciplines that are located within the areas of economics and ecology

Agrobiodiversity Conservation and Economic Development Andreas Kontoleon, Unai Pascual, Melinda Smale, 2008-10-03 Pt 1 Policy perspectives pt 2 Multiple objectives trade offs and synergies between productivity and agrobiodiversity pt 3 Market and non market institutions for agrobiodiversity conservation Environmental Amenities and Regional Economic Development Todd L. Cherry, Dan Rickman, 2009-12-04 Rising U S income and wealth in recent decades have fueled an increase in consumption demand for environmental amenities Many observers and researchers have argued that this at least in part underlies current differentials in economic growth across regions This collection of key articles addresses the issues and more

Environmental Efficiency, Innovation and Economic Performances Anna Montini, Massimiliano Mazzanti, 2010-07-02 This volume brings together microeconomics studies on firms eco and economic performance both in the industrial and service sector by considering a sector based perspective rooted mainly in the exploitation of NAMEA data at regional level and a macroeconomic analysis of the environment income and welfare

Government and the Environment Laura Castellucci, 2014-06-13 In the today s global commercial society an inquiry into the economic role of government is gaining momentum Many crucial goods for the wellbeing of a society are not commercial national security and clean air are great examples This means that the economic role of government is not limited to cure the so called market failures but it has to provide for non commercial goods Unfortunately in the last few decades the decline of the political economic culture of western post industrial societies has left scope for people to blindly believe in a free deregulated market This book brings the culture of the state in from the cold by confronting readers at the start with the necessity of recognizing the fundamental difference between private commercial interests whose provision rests on the culture of profit and public shared interests whose provision rests on the culture of the state This book also explores how

much individual wellbeing does depend on both The only chance for public shared interests with their non profit nature to successfully keep their ground in the face of the overwhelming power of private commercial financial interests lies in regenerating a political economic state culture whereby governments and policy makers politicians understand their responsibility and social function to consist primarily in pursuing the satisfaction of the formers and not in acting on behalf of the latter

Conservation of Tropical Plant Species M.N. Normah,H.F. Chin,Barbara M. Reed,2012-08-04 The book is designed to provide a review on the methods and current status of conservation of the tropical plant species It will also provide the information on the richness of the tropical plant diversity the need to conserve and the potential utilization of the genetic resources Future perspectives of conservation of tropical species will be discussed Besides being useful to researchers and graduate students in the field we hope to create a reference for a much wider audience who are interested in conservation of tropical plant diversity

The Ethics and Politics of Environmental Cost-Benefit Analysis Karine Nyborg,2012-05-31 Putting a price tag on the environment is controversial This book discusses ethical and political aspects of environmental cost benefit analysis why controversies must be expected why they should be taken seriously and how they can be handled in practice Cost benefit analysis is commonly thought of as a method for ranking projects according to their contributions to social welfare The starting point of the present book is different Rather than providing a final ranking the purpose of a project analysis is to enable participants in a democratic decision making process to make their own well founded rankings of projects according to their own normative views Since ethical and political views differ the analysis should be useful as factual background for any reasonable social welfare judgement This purpose faces the analyst with quite different challenges than the purpose of ranking projects The argument of the book is based on economic theory but with a strong emphasis on readability and applicability It is aimed at those economists and non economists alike who use or are faced with cost benefit analysis and environmental valuation in their work politicians employees of ministries and regulatory agencies students journalists consultants and researchers No particular prior knowledge of economics is required

The Cooperation Challenge of Economics and the Protection of Water Supplies Joan Hoffman,2010-04-05 In this book Joan Hoffman examines the watershed collaboration from an economic perspective as well as the possibility of alternative means of water protection such as regulation The case is examined in the light of similar collaborations elsewhere in the world

Forests and Development Philippe Delacote,2012-04-27 This book is a fully up to date study of the major issues facing forest conservation and the forestry industry which considers developments at local national and global levels Environmental and development topics relating to each level are discussed for instance the use of forest products in a rural poverty context corruption and forest harvesting and consumption as a political device Delacote employs a quantitative approach in order to analyse the plight of tropical forests in the developing world and in doing so produces a range of interesting conclusions This methodology fills a crucial research gap in existing studies of forests in a development context increased use of theoretical

tools to interpret real life situations might be beneficial to the field Therefore the first objective of this book is to provide a sample of theoretical analysis concerning the forests and development nexus The second objective is to supply empirical economists with new theoretical insights with the hope that those results can emerge with conclusive field testing and relevant policy recommendations

Optimal Control of Age-structured Populations in Economy, Demography, and the Environment Raouf Boucekkine, Natali Hritonenko, Yuri Yatsenko, 2013-05-13 This book covers a wide range of topics within mathematical modelling and the optimization of economic demographic technological and environmental phenomena Each chapter is written by experts in their field and represents new advances in modelling theory and practice These essays are exemplary of the fruitful interaction between theory and practice when exploring global and local changes The unifying theme of the book is the use of mathematical models and optimization methods to describe age structured populations in economy demography technological change and the environment Emphasis is placed on deterministic dynamic models that take age or size structures delay effects and non standard decision variables into account In addition the contributions deal with the age structure of assets resources and populations under study Interdisciplinary modelling has enormous potential for discovering new insights in global and regional development Optimal Control of Age structured Populations in Economy Demography and the Environment is a rich and excellent source of information on state of the art modelling expertise and references The book provides the necessary mathematical background for readers from different areas such as applied sciences management sciences and operations research which helps guide the development of practical models As well as this the book also surveys the current practice in applied modelling and looks at new research areas for a general mathematical audience This book will be of interest primarily to researchers postgraduate students as well as a wider scientific community including those focussing on the subjects of applied mathematics environmental sciences economics demography management and operations research
