Ground Operations Lester Grau,2025-12-01 Translated to English from the original Soviet General Staff report this is an
 account of the naval support of the Petsamo Kirkenes Operation in October 1944 the only large scale ground naval and air
 operation ever fought in the Arctic With additional contemporary supporting material on wider scale Arctic combat including
 descriptions of combat tactics and weaponry from noted Soviet military scholar James Gebhardt this book provides a
 comprehensive and detailed description of the tactics and strategies employed by both Soviet and German forces during the
 operation from the official Soviet perspective The largest Arctic battle on record involving 133 500 Soviets and 45 000
 Germans and Quisling Norwegians the Petsamo Kirkenes Operation sought to liberate the northernmost part of Norway from
 German occupation during World War II The Soviet navy played a previously unrecognized crucial role in the operation by
 providing fire support and transportation as well as conducting raids and combat landings on the enemy held coast The harsh
 Arctic environment including extreme cold ice and limited daylight posed significant challenges to the Soviet and German
 forces Despite these hardships the Soviet forces achieved their objectives defeated the German Army and successfully
 liberated the area Arctic Naval Combat in Support of Ground Operations is a powerful companion to Gebhardt s previous
 translation The Petsamo Kirkenes Operation Soviet Breakthrough and Pursuit in the Arctic October 1944 which details this
 operation s ground offensive Providing a starting point for the study and understanding of combined arms and services

Soviet Airborne Forces 1930-91 David Campbell, 2020-02-20 Established in 1932 the Vozdushno desantnye voyska air landing forces or VDV of the Red Army led the way in airborne doctrine and practice Though they were initially handicapped by a lack of infrastructure due in part to a turbulent political climate in the 1930s they still conducted major drops during World War II including at the Dnepr River in September 1943 After the war ended the VDV became independent of the Air Force and were elevated to the role of strategic asset The newly rebuilt divisions were now organized and trained to conduct deep insertions behind enemy lines attacking command and control facilities lines of communication and key infrastructure targets such as nuclear power plants This training came into play in numerous Cold War confrontations including Soviet operations in Hungary 1956 and Czechoslovakia 1968 During the Soviet war in Afghanistan 1979 89 the VDV proved to be the most formidable of the Mujahideen s opponents with the development of the air assault concept the transport insertion and support of air landed troops by helicopter rather than parachute This title explores the development of the VDV from their conception in 1930 to their role in the Cold War and in the later invasion of Afghanistan Supported by contemporary photography and specially commissioned artwork of uniforms and battlescenes this title is a comprehensive and engaging guide to the history of airborne forces in the Soviet period
