Ak Jain Manual Of Physiology:

Pathophysiology for Medical and Allied Students Mohan B Dikshit, 2016-07-28 The book is written system wise. The theme includes the way alterations are produced in normal physiology by disease leading to the generation of symptoms and signs. This approach is expected to help the student appreciate the role of basic sciences in understanding the pathophysiology of disease. Simple flow charts and diagrams are used to explain the text. For each chapter, there is a Short Questions Answers module which offers explanation to the questions raised in the text. The book has been treated keeping in view the environmental and socio-economic factors that control lives in India. There has been no attempt to deal with every mundane subject in the field of physiology. In each chapter, only certain aspects of the subject have been dealt with. The areas chosen are generally found interesting by most students. Two chapters, namely Circadian Rhythms and Pathophysiology of Stress and Pathophysiology of Thermoregulatory Disorders, are new innovations. The aim of the book is to enthuse the student into thinking in Clinical terms using basic sciences as back drop and to conceptualize and derive conclusions rather than memorize facts.

Handbook of Nutrition, Diet, and the Eye Victor R Preedy, 2014-04-01 The Handbook of Nutrition, Diet, and the Eye is the first book to thoroughly address common features and etiological factors in how dietary and nutritional factors affect the eye. The ocular system is perhaps one of the least studied organs in diet and nutrition, yet the consequences of vision loss can be devastating. One of the biggest

contributors to complete vision loss in the western hemisphere is diabetes precipitated by metabolic syndrome In some developing countries micronutrient deficiencies are major contributory factors to impaired vision However there are a range of ocular defects that have either their origin in nutritional deficiencies or excess or have been shown to respond favorably to nutritional components The eye from the cornea to the retina may be affected by nutritional components Effects may be physiological or molecular This book represents essential reading for nutritionists dietitians optometrists ophthalmologists opticians endocrinologists and other clinicians and researchers interested in eye health and vision in general Saves clinicians and researchers time in quickly accessing the very latest details on a broad range of nutrition ocular health and disease issues Provides a common language for nutritionists nutrition researchers optometrists and ophthalmologists to discuss how dietary and nutritional factors and related diseases and syndromes affect the eye Preclinical clinical and population studies will help nutritionists dietitians and clinicians map out key areas for research and further clinical recommendations
