The Ecology of Money Adrian Kuzminski, 2013-05-16 Modern economies must grow because money borrowed for investment can be repaid only by expanding production and consumption to meet the burden of usurious rates of interest The roots of this dynamic between debt and growth lay in the financial revolution of the late seventeenth and early eighteenth centuries in Britain which established a new usurious monetary system For the first time in history credit was made widely available but only on condition of an exponentially increasing debt burden To pay back debts production had to increase correspondingly leading to the industrial revolution economic growth and modernity itself Though private creditors gained a monopoly over the creation of credit and were disproportionately enriched the resulting economic growth for a time was great enough to benefit most debtors as well as creditors ensuring widespread prosperity That is no longer the case With today s eco crisis we have reached the limits of growth We no longer have the natural resources to grow fast enough to pay our debts This is the real root of our current financial crisis If we are to live sustainably our system of money

and credit must be transformed We need a non usurious monetary system appropriate to a steady state economy with capital broadly distributed at non usurious rates of interest Such a system was developed by an early nineteenth century American thinker Edward Kellogg and is explored here in depth His work inspired the populist movement and remains more relevant than ever as a viable alternative to the a financial system we can no longer afford *Dark Green Religion* Bron Raymond Taylor, 2010 A love of green may be a human universal Deepening the palette of green scholarship Bron Taylor proves remarkably to be both an encyclopedist and a visionary Jonathan Benthall author of *Returning to Religion Why a Secular Age is Haunted by Faith* This important book provides insight into how a profound sense of relation to nature offers many in the modern world a vehicle for attaining a spiritual wholeness akin to what has been historically associated with established religion In this sense *Dark Green Religion* offers both understanding and hope for a world struggling for meaning and purpose beyond the isolation of the material here and now Stephen Kellert Yale University School of Forestry and Environmental Studies In this thought provoking volume Bron Taylor explores the seemingly boundless efforts by human beings to understand the nature of life and our place in the universe Examining in depth the ways in which influential philosophers and naturalists have viewed this relationship Taylor contributes to the further development of thought in this critically important area where our depth of understanding will play a critical role in our survival Peter H Raven President Missouri Botanical Garden Carefully researched strongly argued originally conceived and very well executed this book is a vital contribution on a subject of immense religious political and environmental importance It s also a great read Roger S Gottlieb author of *A Greener Faith Religious Environmentalism and our Planet s Future* A fascinating analysis of our emotional and spiritual relationship to nature Whether you call it dark green religion or something else Bron Taylor takes us through our spiritual relationship with our planet its ecosystems and evolution in an enlightened and completely undogmatic manner Dr Claude Martin Former Director General World Wildlife Fund An excellent collection of guideposts for perplexed students and scholars about the relationships of nature religions spirituality animism pantheism deep ecology Gaia and land ethics and for the environmentalist seeking to make the world a better place through green religion as a social force Fikret Berkes author of *Sacred Ecology Traditional Ecological Knowledge and Resource Management* *Dark Green Religion* shows conclusively how nature has inspired a growing religious movement on the planet contesting the long reign of many older faiths Taylor expertly guides us through an astonishing array of thinkers past and present who have embraced in part or whole the new religion I was thoroughly convinced that this movement has indeed become a major force on Earth with great potential consequences for our environmental ethics Donald Worster University of Kansas In this exceptionally interesting and informative book Bron Taylor has harvested the fruits of years of pioneering research in what amounts to a new field in religious studies the study of how religious spiritual themes show up in the work of people concerned about nature in many diverse ways Taylor persuasively argues that appreciation of nature s sacred or spiritual dimension both informs and

motivates the work of individuals ranging from radical environmentalists and surfers to eco tourism leaders and museum curators I highly recommend this book for everyone interested learning more about the surprising extent to which religious spiritual influences many of those who work to protect to exhibit or to represent the natural world Michael E Zimmerman Director Center for Humanities and the Arts University of Colorado at Boulder [Psychological Insights for Understanding COVID-19 and Society](#) S. Alexander Haslam,2020-12-13 In the Psychological Insights for Understanding COVID 19 series international experts introduce important themes in psychological science that engage with people s unprecedented experience of the pandemic drawing together chapters as they originally appeared before COVID 19 descended on the world This book explores how COVID 19 has impacted society and chapters examine a range of societal issues including leadership and politics community social status welfare social exclusion and accountability Addressing the social and psychological processes that structure and are structured by our social contexts it shows not only how groups and individuals can come together to manage global crises but also how these crises can expose weaknesses in our society The volume also reflects on how we can work together to rebuild society in the aftermath of the pandemic by cultivating a shared sense of responsibility through social integration and responsible leadership Showcasing theory and research on key topics germane to the global pandemic the Psychological Insights for Understanding COVID 19 series offers thought provoking reading for professionals students academics and policy makers concerned with the psychological consequences of COVID 19 for individuals families and society **Degrowth in the Suburbs** Samuel Alexander,Brendan Gleeson,2018-09-21 This book addresses a central dilemma of the urban age how to make the vast suburban landscapes that ring the globe safe and sustainable in the face of planetary ecological crisis The authors argue that degrowth a planned contraction of economic overshoot is the only feasible principle for suburban renewal They depart from the anti suburban sentiment of much environmentalism to show that existing suburbia can be the centre ground of transition to a new social dispensation based on the principle of self limitation The book offers a radical new urban imaginary that of degrowth suburbia which can arise Phoenix like from the increasingly stressed cities of the affluent Global North and guide urbanisation in a world at risk This means dispensing with much contemporary green thinking including blind faith in electric vehicles and high density urbanism and accepting the inevitability and the benefits of planned energy descent A radical but necessary vision for the times **A New Stage of Civilization** Shixiong Cao,2025-08-11 Cao interprets the culture politics economics and the environmental problems that society faces from the perspective of a scholar exploring potential solutions to the current global political dilemmas and providing intellectual support for a smooth transition of society to the next stage of civilisation [Human Dependence on Nature](#) Haydn Washington,2013-05-07 Humanity is dependent on Nature to survive yet our society largely acts as if this is not the case The energy that powers our very cells the nutrients that make up our bodies the ecosystem services that clean our water and air these are all provided by the Nature from which we have evolved and of which we are a part This book

examines why we deny or ignore this dependence and what we can do differently to help solve the environmental crisis. Written in an accessible and engaging style, Haydn Washington provides an excellent overview of humanity's relationship with Nature. The book looks at energy flow, nutrient cycling, ecosystem services, ecosystem collapse, as well as exploring our psychological and spiritual dependency on nature. It also examines anthropocentrism and denial as causes of our unwillingness to respect our inherent dependence on the natural environment. The book concludes by bringing these issues together and providing a framework for solutions to the environmental crisis.

Handbook of Research on Entrepreneurial Development and Innovation Within Smart Cities Carvalho, Luisa Cagica, 2017-01-25. While the population continues to grow and expand, many people are now making their homes in cities around the globe. With this increase in city living, it is becoming vital to create intelligent urban environments that efficiently support this growth and that simultaneously provide friendly, progressive environments to both businesses and citizens alike. The Handbook of Research on Entrepreneurial Development and Innovation Within Smart Cities is a comprehensive reference source that discusses social, economic, and environmental issues surrounding the evolution of smart cities. It provides insightful viewpoints on a range of topics such as entrepreneurial ecosystems, competitive tourism, city efficiency, corporate social responsibility, and smart destinations. This publication is ideal for all researchers, academics, and practitioners that wish to expand their knowledge on the emerging trends and topics involving smart cities.

Key Thinkers in Religion and Environment Lucas F. Johnston, 2024-07-01. Key Thinkers in Religion and Environment provides a theoretical foundation for scholarship related to the intersection of religions, natures, and cultures across disciplines. The text introduces students to the major names, theoretical issues, and methodological orientations of the field while giving professors maximum freedom to insert case studies and examples as they wish. Students will come away with an understanding of the most important scholars, their theoretical contributions, and the scholarly conundrums with which they wrestled. The book includes figures who are foundational to the field of religious studies, more broadly foregrounding key themes in their works which highlight the nature in/of their argumentation whilst also highlighting the voices of women and people of color. The thinkers come from a range of fields including religious studies, philosophy, anthropology, sociology, American Indian studies, ethology, agroecology, theology, and environmental history, demonstrating the importance and impact of interdisciplinary research. The book also offers a theoretical orientation which illuminates methodological and theoretical deficits in religious studies more generally whilst opening new avenues for thinking about environmental ethics. It is a must-read for all students and researchers of religion and the environment.
