A Systems Theory Of Religion Cultural Memory In The Present:

A Systems Theory of Religion Niklas Luhmann, 2013-01-09 A Systems Theory of Religion still unfinished at Niklas Luhmann's death in 1998 was first published in German two years later thanks to the editorial work of Andr Kieserling One of Luhmann's most important projects it exemplifies his later work while redefining the subject matter of the sociology of religion Religion for Luhmann is one of the many functionally differentiated social systems that make up modern society All such subsystems consist entirely of communications and all are autopoietic which is to say self organizing and self generating Here Luhmann explains how religion provides a code for coping with the complexity opacity and uncontrollability of our world Religion functions to make definite the indefinite to reconcile the immanent and the transcendent Synthesizing approaches as disparate as the philosophy of language historical linguistics deconstruction and formal systems theory cybernetics A Systems Theory of Religion takes on important topics that range from religion's meaning and evolution to secularization turning decades of sociological assumptions on their head It provides us with a fresh vocabulary and a fresh philosophical and sociological approach to one of society's most fundamental phenomena The Evangelical Counter-Enlightenment William R. Everdell, 2021-05-21 This contribution to the global history of ideas uses biographical profiles of 18th century contemporaries to find what Salafist and Sufi Islam Evangelical Protestant and Jansenist Catholic Christianity and Hasidic Judaism have in common Such figures include Muhammad Ibn Abd al Wahab Count Nikolaus Zinzendorf Jonathan Edwards John Wesley Jean Jacques Rousseau and Israel Ba'al Shem Tov The book is a unique and comprehensive study of the conflicted relationship between the evangelical movements in all three Abrahamic religions and the ideas of the Enlightenment and Counter Enlightenment Centered on the 18th century the book reaches back to the third century for precedents and context and forward to the 21st for the legacy of these movements This text appeals to students and researchers in many fields including Philosophy and Religion their histories and World History while also appealing to the interested lay reader **Revisiting Institutionalism in Sociology** Seth Abrutyn, 2013-11-07 There may not be a concept so central to sociology yet so vaguely defined in its contemporary usages than institution In *Revisiting Institutionalism in Sociology* Abrutyn takes an in depth look at what institutions are by returning to some of the insights of classical theorists like Max Weber and Herbert Spencer the functionalisms of Talcott Parsons and S N Eisenstadt and the more recent evolutionary institutionalisms of Gerhard Lenski and Jonathan Turner Returning to the idea that various levels of social reality shape societies Abrutyn argues that institutions are macro level structural and cultural spheres of action exchange and communication They have emergent properties and dynamics that are not reducible to other levels of social reality Rather than fall back on old functionalist solutions Abrutyn offers an original and synthetic theory of institutions like religion or economy the process by which they become autonomous or distinct cultural spaces that shape the color and texture of action exchange and communication embedded within them and how they gain or lose autonomy by theorizing

about institutional entrepreneurship Finally Abrutyn lays bare the inner workings of institutions including their ecology the way structure and culture shape lower levels of social reality and how they develop unique patterns of stratification and inequality founded on their ecology structure and culture Ultimately Abrutyn offers a refreshing take on macrosociology that brings functionalist conflict and cultural sociologies together while painting a new picture of how the seemingly invisible macro world influences the choices humans make and the goals we set *A Theology of Justice in Exodus* Nathan

Bills,2020-10-16 This book traces the theme of justice throughout the narrative of Exodus in order to explicate how yhwh s reclamation of Israel for service worship reveals a distinct theological ethic of justice grounded in yhwh s character and Israel s calling within yhwh s creational agenda Adopting a synchronic text immanent interpretive strategy that focuses on canonical and inner biblical connections Nathan Bills identifies two overlapping motifs that illuminate the theme of justice in Exodus First Bills considers the importance of Israel s creation traditions for grounding Exodus s theology of justice Reading Exodus against the backdrop of creation theology and as a continuation of the plot of Genesis Bills shows that the ethical disposition of justice imprinted on Israel in Exodus is an application of yhwh s creational agenda of justice Second Bills identifies an educational agenda woven throughout the text The narrative gives heightened attention to the way yhwh catechizes Israel in what it means to be the particular beneficiary and creational emissary of yhwh s justice These interpretative lenses of creation theology and pedagogy help to explain why Israel s salvation and shaping embody a programmatic applicability of yhwh s justice for the wider world This volume will be of substantial interest to divinity students and religious professionals interested in the themes of exodus exile and return Religion and Cultural Memory

Jan Assmann,Rodney Livingstone,2006 In ten brilliant essays Jan Assmann explores the connections between religion culture and memory Building on Maurice Halbwachs s idea that memory like language is a social phenomenon as well as an individual one he argues that memory has a cultural dimension too He develops a persuasive view of the life of the past in such surface phenomena as codes religious rites and festivals and canonical texts on the one hand and in the Freudian psychodrama of repressing and resurrecting the past on the other Whereas the current fad for oral history inevitably focuses on the actual memories of the last century or so Assmann presents a commanding view of culture extending over five thousand years He focuses on cultural memory from the Egyptians Babylonians and the Osage Indians down to recent controversies about memorializing the Holocaust in Germany and the role of memory in the current disputes between Israelis and Palestinians in the Middle East and between Protestants and Catholics in Northern Ireland Play Among Books Miro

Xygalatas,Luther H. Martin,Donald Wiebe,2024-09-05 Celebrating the contributions of Panayotis Pachis to the field this book discusses the past present and future of the study of religion in antiquity and modernity Panayotis Pachis has dedicated his celebrated career at the Aristotle University of Thessaloniki to the study of various aspects of ancient religions The contents of this book reflect Pachis conviction that the study of religious ideas and practices should be focused on three pillars the study of history the formulation and application of theoretical frameworks and the utilization of traditional as well as innovative methodological tools Chapters range from the scientific study of Roman Graeco religions cultural evolution and neurocognitive theories in the history and study of religion to a look at why we need an integrative approach to study religion past and present **Mind, Morality and Magic** Istvan Czachesz,Risto Uro,2014-10-14 The cognitive science of religion

that has emerged over the last twenty years is a multidisciplinary field that often challenges established theories in anthropology and comparative religion This new approach raises many questions for biblical studies as well What are the cross cultural cognitive mechanisms which explain the transmission of biblical texts How did the local and particular cultural traditions of ancient Israel and early Christianity develop What does the embodied and socially embedded nature of the human mind imply for the exegesis of biblical texts Mind Morality and Magic draws on a range of approaches to the study of the human mind including memory studies computer modeling cognitive theories of ritual social cognition evolutionary psychology biology of emotions and research on religious experience The volume explores how cognitive approaches to religion can shed light on classical concerns in biblical scholarship such as the transmission of traditions ritual and magic and ethics as well as uncover new questions and offer new methodologies *In the Self's Place* Jean-Luc Marion,2012-10-24

In the Self's Place is an original phenomenological reading of Augustine that considers his engagement with notions of identity in Confessions Using the Augustinian experience of confessio Jean Luc Marion develops a model of selfhood that examines this experience in light of the whole of the Augustinian corpus Towards this end Marion engages with noteworthy modern and postmodern analyses of Augustine's most experiential work including the critical commentaries of Jacques Derrida Martin Heidegger and Ludwig Wittgenstein Marion ultimately concludes that Augustine has preceded postmodernity

in exploring an excess of the self over and beyond itself and in using this alterity of the self to itself as a driving force for creative relations with God the world and others This reading establishes striking connections between accounts of selfhood across the fields of contemporary philosophy literary studies and Augustine s early Christianity
