Material Cultures of Psychiatry Monika Ankele, Benoît Majerus, 2020-10-08 In the past our ideas of psychiatric hospitals and their history have been shaped by objects like straitjackets cribs and binding belts These powerful objects were often used as a synonym for psychiatry and the way psychiatric patients were treated yet very little is known about the agency of these objects and their appropriation by staff and patients By focusing on material cultures this book offers a new perspective on the history of psychiatry it enables a narrative in which practicing psychiatry is part of a complex entanglement in which power is constantly negotiated Scholars from different academic disciplines show how this material based approach opens up new perspectives on the agency and imagination of men and women inside psychiatry

Narrative Matters in Medical Contexts across Disciplines Franziska Gygax, Miriam A. Locher, 2015-03-13 This collection of original chapters gives center stage to the concept of narrative in medical contexts. The contributors come from the disciplines of literary and cultural studies, linguistics, psychology, and medicine and work with texts as diverse as autobiographies, graphic novels, Renaissance medical treatises and reports, short stories, reflective writing, creative writing, and online narratives. The interdisciplinary dialogue shows the richness and scope of the concept narrative and demonstrates how crucial it is for practices in the medical context as well as in the contributing disciplines. The collection raises awareness of the great variety and multivocality of narratives on the experience of illness, besides paying heed to the many different positions and angles from which these narratives can be perceived, read, and analyzed. The wide range of approaches assembled in this collection provides a comprehensive view on illness and health and on the multiple ways in which they are represented in narrative.
