Thomas, 2008-10-30 Because of 9 11 there is universal recognition that aviation security is a deadly serious business Still around the world today the practice of aviation security is rooted in a hodgepodge of governmental rules industry traditions and local idiosyncrasies In fact nearly seven years after the largest single attack involving the air transport industry there remains no viable framework in place to lift aviation security practice out of the mishmash that currently exists It is the ambitious intent of Aviation Security Management to change that The goals of this set are nothing less than to make flying safer to make transporting goods by air safer and to lay the foundation for the professionalization of this most important field This dynamic set showcases the most current trends issues ideas and practices in aviation security management especially as the field evolves in the context of globalization and advances in technology Written by leading academic thinkers practitioners and former and current regulators in the field the three volumes highlight emerging and innovative practices illustrated with examples from around the world Volume 1 takes a penetrating look at the overall framework in which aviation security management has taken place in the past and will likely do so in the foreseeable future It covers the major areas of focus for anyone in the aviation security business and it provides a basis for educational programs Volume 2 delves into the emerging issues affecting aviation security managers right now Volume 3 Perspectives on Aviation Security Management covers the full spectrum of international aviation security related issues It will serve as part of the foundation for the next generation of research in the area in both a business and cultural context Collectively these volumes represent the state of the art in the field today and constitute an essential resource for anyone practicing studying teaching or researching aviation security management

Aviation Security Ruwantissa I.R. Abeyratne, 2018-12-13 Published in 1998 The various conventions which apply to the subject of unlawful interface with civil aviation have proved effective only to the extent of nurturing existing values of international law as they are restrictively perceived through the parameters of air law This book examines the offence of unlawful interference with international civil aviation and analyses critically the legal and regulatory regime that applies thereto with a view to recommending measures that are calculated to infuse a new approach to the problem Emphasis is laid throughout the work on action which may be taken to alleviate the problem of unlawful interference Its conclusion incorporates various steps that can be taken towards achieving this objective The author focuses on the core of the problem which has effectively precluded significant progress into inroads that would curb the threat terrorism in aviation the attitude of the international community The book therefore examines in limine the fundamental role of international law in the light of the United Nations Congress of International Public Law of March 1995 and its effect on international criminal law It then determines the applicable principles of State sovereignty and examines the principles of State responsibility Its main purpose is to recommend the establishment of a new philosophy of international criminal law which transcends municipal boundaries Academic scholarly and judicial precedent

for this book is the adduced in support of this argument The book also examines the role of International Civil Aviation Organization ICAO as the regulatory body responsible for civil aviation in the context of new approaches made by the international community towards the status of ICAO in aviation security The practical value of this work essentially lies in the legal recommendations it makes at its conclusion which are based on existing principles of international law It will thus be invaluable not only to international and aviation lawyers criminal lawyers both international and national security professionals and teachers and students of international law but also to aviation industry executives and regulatory agency specialists whose responsibilities impinge on or are determined by existing and evolving legal and security measures
