10 Great Curricula Thomas S. Poetter, 2012-01-01 With Susan L M Bartow Lara A Chatman Daniel Ciamarra Christopher L Cox Dawn Mann Kevin J Smith Kevin M Talbert Mary A Webb and Amy Fisher Young 10 Great Curricula is a collection of stories written by educators who have come to understand curricula differently as a result of their engagement with a graduate course and its instructor The book represents the best of what can be found in teaching and learning in general and in the quest for meaningful ways to understand curricula in particular The co authors of this volume on 10 Great Curricula framed their inquiries into progressive democratic curricula at least initially through Marsh and Willis 2007 notions of planned enacted and lived curricula These frames helped the writers think about how to engage a curriculum as it is developed delivered and lived by its participants and for the inquirers to actually become participant inquirers in the curriculum at hand The chapters depict the power the possibility and the transformational potential of great progressive curricula today by locating them in schools and in the community by making them come alive to the reader and by suggesting means through which the reader can adopt a more progressive democratic stance to curriculum despite the seemingly overwhelming nature of the conservative traditionalist instrumentalist movements in curriculum teaching and assessment today The book is intended for students of education teaching and curriculum undergraduates graduates and practicing educational professionals especially those looking for examples in the world in which progressive democratic ideals are nurtured and practiced
