As you move through the module, answer the following questions:

1. Recognize Cues (Assessment)

- a. Identify relevant client information that indicated the need to contact the Rapid Response Team.

The indication for a rapid response team would be if the interventions that we were currently completing were not effective and needed more hands-on deck and needing ICU transfer, cardiac arrest, or death. I would call a rapid response. For instance, I would call one if the patient became lethargic, SOB without improvement with NRB, pale, tachycardic, hypotensive and unresponsive.

2. Analyze Cues (Analysis)

- a. How does Janet Lieberman's response to the blood transfusion compared to the expected response?

Janet Lieberman had a reaction to the components of the blood starting her second pint. She had a headache, chills and restless. The nurse did the correct thing by stopping the infusion and contacting the doctor. She was having a reaction to the product in the second pint, which is the plasma proteins or antigens on contaminated white blood cells or platelets.

3. Prioritize Hypotheses (Analysis)

- a. What would be the priority problem for Janet Lieberman following endoscopy?

The priority problem I believe is her pain 8/10 with cramping and discomfort following eating acidic food such as tomato soup.

4. Generate Solutions (Planning)

- a. What members of the healthcare team could assist with this priority problem?

The nurse, doctor and patient all assist with this priority. The nurse will contact the doctor for medication if it is not ordered and the patient will receive the medication in hopes there is improvement.

5. Take Actions (Implementation)

- a. What nursing interventions would be appropriate to address the priority problem?

The patient could have a diet change to non-acidic liquids to prevent bleeding as well as pain. The patient can be educated on NSAIDs and bleeding.

6. Evaluate Outcomes (Evaluation)

- a. How would you modify interventions if Janet Lieberman does not meet expected outcomes?

I would modify her to stay on a clear liquid diet and give her medication not in the NSAID family.

After completing the simulation, answer the following questions:
