EVOLUTION

SOLUTIONS TO THE
PRACTICE QUESTIONS
MODULE 8

Answers	
1. a. Adaptability of species	The idea that each individual species on the planet was specially created by God and could never fundamentally change.
b. Microevolution	The theory that small individual variations over time could be acquired and inherited to form a more diversified species or that acquired variations could be passed on to future generations.
c. Macroevolution	The hypothesis that processes which are thought to work at a microevolution level could operate at a macroevolution level to produce different species.
d. Speciation	Process by which new species arise.
e. Fossil	Preserved remains of once-living organisms.
f. Phylogenetics	The study of life.
g. Diverging homology	Homology of parts developed in different species.

2. The old model of his research which he now no longer holds the AGMO model. This is based on years of research showing the theory before publishing that this is an actually flawed model. His work's progress was in progress although he made some of his others aware that his old theory was the Galapagos model. It was not the step that he did not take.
3. The theory that there are two main groups.
4. In addition, he found it is common enough that animals that are not a common group. This would have been common with the concept of natural selection.
